

"0/100 RATE" TAX PLAN: EXEMPT 70% OF AMERICANS FROM INCOME TAX AND SLASH RATES TO 15%

• *The first \$100,000 of an individual payer's income or business net profit is 100% tax-exempt*

LEXINGTON, KY, UNITED STATES, June 11, 2026 /EINPresswire.com/ -- A bold legislative blueprint, the "0/100 Rate" Tax Plan, was unveiled today. The policy completely rewrites the complicated, 70,000-page federal tax code, replacing it with a hardline, two-tiered framework built to trigger massive economic growth and rescue the American working class.

The massive real-world impact of this framework is best illustrated by a single worker earning \$100,000:

- "0/100 Rate" Plan: A single earner pays \$0 on \$100,000 of earnings.

The core of the framework delivers immediate financial oxygen where it is needed most:

- The first \$100,000 of an individual payer's income or business net profit is 100% tax-exempt (0% statutory rate).
- A single flat rate of 20% applies exclusively to the money earned above that \$100,000 baseline.

By entirely untaxing the first \$100,000 of individual income, the plan instantly wipes out all federal income tax liabilities for 65% to 70% of American households.

Crucially, the flat rate completely closes the complex loopholes used by corporate titans to evade liabilities, while aggressively promoting American production. Rather than relying on heavy-handed mandates, the plan offers multi-national conglomerates a voluntary structural choice: opt into a highly competitive 20% standard rate by investing in domestic facilities, or select a straightforward 25% non-compliance market-access rate if they choose to maintain overseas supply chains. This market-driven flexibility seamlessly rewards companies that move the United States back to our core strength of manufacturing.

Unlike conventional political promises that balloon national debt, the "0/100 Rate" framework features a mathematically bulletproof, deficit-neutral design. It enforces immediate fiscal discipline on Year 1 through strict federal spending cuts, an unyielding government spending freeze, and the total eradication of special-interest corporate loopholes.

To lock in permanent legislative accountability, the plan binds Washington to a strict

performance trigger: maintaining a balanced ledger incrementally drops the flat tax rate to a permanent floor of 15% over three years. Running a deficit triggers automatic, universal government austerity.

The comprehensive policy whitepaper contains detailed, high-stakes architectures covering domestic manufacturing incentives, offshore corporate cash repatriation, short-term Wall Street speculation curbs, and market-access options for American factories.

The full whitepaper, including detailed fiscal impact matrices, economic modeling, and policy comparisons, is available upon request.
