

Internet Security Alliance and National Association of Corporate Directors Launch Webinar Series on AI & Cyber Security

WASHINGTON, DC, UNITED STATES, June 12, 2026 /EINPresswire.com/ -- The advent of frontier AI models are quickly changing the calculus of cybersecurity. It has never been more urgent for corporate boards to coordinate with their security teams in real time to implement proven effective security practices. To help meet these challenges in real time, the Internet Security Alliance (ISA) and the National Association of Corporate Directors (NACD) are launching a series of free monthly webinars based on fifth edition (2026) of the Director's Handbook on Cyber Risk Oversight.

The graphic is a dark blue rectangular banner. At the top left is the NACD logo (a stylized flame) and the text 'NACD | INTERNET SECURITY ALLIANCE'. Below this, the title 'The Director's Handbook: Toolkits to Effectively Oversee AI & Cyber Risk' is written in white. Under the title is the subtitle 'Cybersecurity Oversight: What Boards Should Expect From A Cyber Risk Report'. To the right of the title are four headshots of speakers. Below each headshot is their name and title. At the bottom left is a yellow 'JOIN US' button and the date 'Tuesday, June 23, 12 p.m. EDT'. At the bottom right is the text 'Supported by kyndryl'.

The Director's Handbook: Toolkits to Effectively Oversee AI & Cyber Risk

These handbooks, which are available free of charge at www.isalliance.org or www.nacdonline.org, have been independently assessed (by PwC, MIT, and the World Economic Forum) and found to generate significant improvements in cybersecurity. The webinars will provide a mechanism for the director and security communities to keep abreast of evolving threats and have access to thought leadership from the NACD, ISA, and academic and government experts providing up-to-the-minute advice based on the validated principles and toolkits in the handbooks.

The series will commence on June 23 over [LinkedIn Live](#), with new episodes released monthly. The episodes will cover both core security and resiliency practices and their use in facing a range of ongoing threats, such as ransomware and supply chain attacks, as well as security issues created by emerging technologies such as AI and Quantum.

Each episode will feature a conversation between one of the information security experts from the ISA, who authored the handbook, and leaders sitting on corporate boards, as well as former and current leaders from the highest levels of the U.S. government. The goals are to integrate and coordinate effective security strategies from all perspectives, including providing concrete

advice on how to analyze and address evolving cyber threats.

The first webinar will be moderated by Dylan Sandlin – NACD Manager for Digital Content, and feature

- Brigadier General (Ret.) Greg Touhill, who was also the first CISO for the federal government, is currently Director of the Carnegie Mellon CERT Division as well as a member of the ISA board
- Andrea Bonime-Blanc, founder-CEO of GEC Risk Advisory, NACD Directorship 100 honoree, and author of *Governing Pandora*
- ISA President Larry Clinton

Webinars are supported by 1631 Digital. Further details are listed below. For more information, contact Larry Clinton (llclinton@isalliance.org)

SPOTLIGHT: WEBINAR 1 — JUNE 23, 2026

Cybersecurity Oversight: What Boards Should Expect from a Cyber Risk Report

Boards are getting more cybersecurity information than ever. But volume is not insight. The opening session focuses on one of the most practical questions directors face: what does good reporting actually look like, and how should boards use it?

The conversation zeroes in on Tool-Kit L of the NACD-ISA Handbook, "Example Cybersecurity Board Reporting," and its connection to Principle 1, "Treating Cybersecurity as a Strategic Risk." The session addresses what effective reporting should include, what directors should expect from security leadership, and how better reporting moves boards from passive updates to active oversight.

Moderated by Dylan Sandlin, Program Manager for Digital and Cybersecurity Content at NACD, the session features:

Larry Clinton — President, Internet Security Alliance

Brigadier General (Ret.) Gregory Touhill — First Federal CISO of the United States; Director, Carnegie Mellon CERT Division; ISA Board Member; author of Tool-Kit L

Andrea Bonime-Blanc, JD/PhD — Founder and CEO, GEC Risk Advisory; NACD Directorship 100 Honoree; author of *Governing Pandora*

FEATURED GOVERNMENT LEADERS

Brigadier General (Ret.) Gregory Touhill | Director, Carnegie Mellon University CERT Division (SEI) The first-ever U.S. Federal Chief Information Security Officer. Now leads Carnegie Mellon's CERT Division. Appears in Webinars 1, 5, and 9.

Kemba Walden | President, Paladin Global Institute Former acting U.S. National Cyber Director and principal architect of the 2023 National Cybersecurity Strategy. Previously at the White House, DHS, CISA, and Microsoft. Appears in Webinars 3 and 4.

Paul Connelly | Professor of Practice, Belmont University; Former White House Information Security Officer (three presidents) Built the White House's first information security program. Former CSO at HCA Healthcare (Fortune 100) and partner at PwC. Appears in Webinars 2, 7, and 14.

Bob Liscouski | Former First Assistant Secretary for Infrastructure Protection, U.S. Department of Homeland Security The first senior federal official responsible for coordinating protection of the nation's critical infrastructure across all sectors. Appears in Webinar 9.

Matthew Noyes | Cyber Policy and Strategy Director, U.S. Secret Service Office of Investigations Oversees cyber policy, strategy, and budget for a global network of 160+ Secret Service offices and 3,000 agents. Appears in Webinar 2.

Marisa Trambley | Special Advisor, Federal Bureau of Investigation (FBI) FBI Special Advisor on cybersecurity. Connects boards to federal law enforcement expertise on breach response, notification obligations, and threat intelligence. Appears in Webinar 11.

FEATURED INDUSTRY LEADERS

Industry presenters include:

- J.R. Williamson, SVP and CISO at Leidos and Vice Chairman of ISA (formerly Corporate CIO and Deputy CISO at Northrop Grumman);
- Kris Lovejoy, Global Head of Strategy at Kyndryl, the world's largest IT infrastructure services provider;
- James Lam, widely recognized as the world's first Chief Risk Officer and a bestselling author on enterprise risk management;
- Keri Pearlson, Executive Director of the MIT Sloan Cybersecurity Research Consortium and the country's foremost academic researcher on board-level cyber governance
- Nick Sanna, founder of the SAFE SECURE and FAIR Institute and a leading advocate for quantitative cyber risk measurement.

FULL SCHEDULE

1. June 23, 2026 | Cybersecurity Oversight: What Boards Should Expect from a Cyber Risk Report
2. July 14, 2026 | Personal Cybersecurity for Directors
3. August 18, 2026 | How Should the Board Deal with Emerging Technology?
4. September 15, 2026 | How Boards Should Understand and Address Third-Party Risk
5. October 20, 2026 | How the Board Should Deal with the Challenges and Opportunities of AI
6. November 19, 2026 | Board-Level Metrics: Measuring Cyber Risk in Business Terms
7. December 7, 2026 | Oversight and Disclosure: 10 Questions for the Board
8. January 19, 2027 | The Board's Role in Combating Insider Threats
9. February 16, 2027 | Quantum: The Ultimate Game-Changer Few Boards are Prepared For
10. March 16, 2027 | Addressing the Cyber Risks Created by M&A

11. April 20, 2027 | The Board's Perspective on Incident Response
12. May 18, 2027 | The Persistent Threat of Ransomware
13. June 15, 2027 | The Board's Relationship with the CISO
14. July 20, 2027 | How the Board Should Understand Security in the Cloud
15. August 17, 2027 | The Board's Responsibility to Protect the Cyber Ecosystem: The Need for Collective Action

All webinars: 12:00 PM – 1:00 PM ET via LinkedIn Live. Registration link at LinkedIn Live.

ABOUT THE INTERNET SECURITY ALLIANCE

The Internet Security Alliance is a trade association whose mission is to integrate advanced technology with economics and public policy to promote sustainably secure cyber systems. ISA's board consists of cyber leaders, typically CISOs, from virtually every critical industry sector. For over 20 years, ISA has developed a comprehensive theory and practice for cybersecurity covering both enterprise risk management and government policy. ISA has collaborated with NACD for over a decade to produce the Director's Handbook on Cyber-Risk Oversight, which has become the standard governance reference for corporate boards. For more information, visit isalliance.org.

ABOUT NACD

The National Association of Corporate Directors is the leading membership organization for board directors, offering education, research, and peer exchange to help directors fulfill their governance responsibilities. For more information, visit nacdonline.org.

SERIES SPONSORS

The NACD-ISA Cybersecurity Webinar Series is supported by trusted partners, including 1631 Media.
