

Surveva Launches the World's First Reciprocity Polling App

Ask anything, and the world answers — 10 real, anonymous responses from across the globe through a community-driven platform.

KUWAIT CITY, MUBARAK AL-KABEER,
KUWAIT, June 15, 2026

/EINPresswire.com/ -- Imagine a world connected by questions — where people collaborate and help one another across thousands of miles, and a single spark of curiosity turns into a journey. Today that world goes live with the launch of Surveva, the world's first reciprocity polling app. One question. One answer. One spark. Together, these sparks form something bigger — a dynamic network where curiosity fuels discovery.

Surveva: ask anything, and watch the world respond.

“

It is about being helped by someone you have never met, do not know, and who is perhaps living thousands of miles away.”

Founder of Surveva

At the heart of Surveva is its reciprocal system, and it is simple. A user writes a question. Surveva then shows them ten questions from people around the world, and they vote on them one by one. Then they forget about it — and behind the scenes, the software shows their question to ten other people, who each give a real answer. This is what makes Surveva different: being helped by someone you don't know, have never met, and who is perhaps living thousands of miles away. When it is morning in Australia, it

is night in New York and afternoon in Nairobi — and all of them are helping each other. Everyone contributes, everyone is heard, and the software takes care of the rest. The whole loop takes less than two minutes, and this fair, community-driven model eliminates geographical barriers.

The moment a question gathers votes, Surveva shows instant results enriched with live demographic breakdowns — while no individual identity is ever revealed. But the numbers are only the beginning. The reason a user opens a poll is that, while scanning the feed, the question made something tick in their mind. The Multilayered Experience, powered by AI, expands that moment from different angles — a surprising fact, a reflection, an opposing view — turning a

single vote into an immersive intellectual experience. It is where logic meets emotion, numbers meet meaning, and art meets science.

The experience itself is built for calm. Surveva is a virtual sanctuary where users escape the noise of endless scrolling and instead sit with their own thoughts, swimming in an ocean of polls — from philosophy to wellness to the economy. The atmosphere is deliberately still, and the algorithm is built for exploration, not engagement. Nothing pulls at the user, so their inner voice has room to surface.

Key features:

- The Multilayered Experience — open any question from several angles: a fact, a reflection, and the opposing view.
- Instant Stats — a live score of what the world thinks, the moment you ask.
- Discovery That Feels Alive — a feed that surfaces familiar interests and new horizons alike.
- No Language Barriers — instant translation connects users across any language.
- Share the Spark — polls can be shared with friends, bringing their voices into the conversation.

More than a polling app, Surveva is a global curiosity engine — a reimagination of how people connect, discover, and expand their minds. It is a space where curiosity turns into enlightenment. Surveva is not asking for your time — it's asking for your mind.

Surveva advocates for the pursuit of intellectual curiosity, enabling individuals worldwide to express their opinions and learn from one another through a platform built on reciprocity — generating collective wisdom, one question at a time.

Surveva is available now on iOS and Android.
