

Copeland Home Services Equips DFW Homes With Whole-House Generators Ahead of 2026 Texas Storm Season

The Forney electrical and HVAC contractor is responding to record ERCOT demand forecasts and grid concerns with expanded home backup power installations.

FORNEY, TX, UNITED STATES, June 13, 2026 /EINPresswire.com/ -- [Copeland Home Services](https://www.copelandhomeservices.com), a Forney-based HVAC, plumbing, and electrical contractor, is expanding installation of whole-house standby generators across Dallas-Fort Worth ahead of what the Electric Reliability Council of Texas (ERCOT) projects could be a record-setting summer for grid demand. With the North Texas storm season already active and another hot summer in the forecast, homeowners across Kaufman, Rockwall, and eastern Dallas counties are increasingly looking for permanent backup power solutions.

Copeland Home Services Logo

ERCOT's June 2026 forecast projects a peak summer demand of approximately 92,211 megawatts, nearly 10 percent above last year's peak and roughly 8 percent above the 2023 record. That outlook arrives as Texas continues to rebuild homeowner confidence following Winter Storm Uri in 2021, which knocked out power for millions of residents and remains one of the most cited reasons North Texas families now invest in permanent home backup systems. Spring and early summer storms across the DFW region routinely produce damaging straight-line winds, hail, and tornado activity that pull down overhead distribution lines, leaving residential neighborhoods without power for hours or days at a time.

Copeland's licensed electricians install standby generator systems sized to match each home's actual electrical load, with automatic transfer switches that detect a utility outage and bring the

home back online within seconds. The team handles the full installation scope: load calculation, generator pad placement, natural gas or propane fuel hookup coordination, transfer switch wiring, local permit pulls, and post-install testing. Many homes in Forney, Heath, Rockwall, and Royse City run on natural gas service, which allows for indefinite runtime during an extended outage rather than the limited window provided by portable generators relying on stored fuel.

"Most calls we get after a storm aren't about the generator itself; they're about a homeowner who lost a freezer full of food and a medically dependent family member in the same 18-hour window," said Brandon Copeland, Owner of [Copeland Home Services in Forney, TX](#). "A properly sized standby unit removes that scenario from the table for as long as the gas line keeps flowing."

For homes that already rely on electric medical equipment, well pumps, or sump pumps, the team prioritizes circuits feeding life-safety equipment, refrigeration, HVAC, and at least one well-lit living space rather than defaulting to whole-home coverage that drives up generator size and cost. Copeland's electricians also evaluate existing electrical panels during the consultation, since older 100- and 125-amp services in homes built before the early 2000s often require an upgrade to safely accept the additional inrush load from a generator paired with central air conditioning and modern appliances.

The expansion reflects the broader reality that Texas operates on its own isolated grid, which by design cannot import emergency power from neighboring states the way most U.S. regions can. As more North Texas families weigh that reality alongside record summer temperatures, Copeland Home Services is scheduling consultations through the end of summer for homes wanting backup power in place before the next major storm event.

[About Copeland Home Services](#)

Copeland Home Services is a locally owned HVAC, plumbing, and electrical contractor based in Forney, Texas, serving Dallas-Fort Worth communities including Dallas, Garland, Greenville, Mesquite, Plano, Rockwall, Rowlett, Royse City, Heath, Fate, Wylie, Sachse, Murphy, Sunnyvale, Balch Springs, Terrell, and Seagoville. Founded by Brandon Copeland, the company holds Texas HVAC License TACLB121002E and Master Plumber License M41431, and was recognized as a 2024 Nextdoor Neighborhood Faves winner. The team provides 24/7 emergency service, transparent pricing, and discounts for veterans and first responders. Learn more at <https://copelandairtexas.com/>.
