

Clean Pro Gutter Cleaning Spotlights Heavy-Rain Guard Guidance for New Orleans

Clean Pro connects heavy-rain gutter guard guidance with New Orleans storm exposure, drainage infrastructure, and local service-request patterns

NEW ORLEANS, LA, UNITED STATES, June 15, 2026 /EINPresswire.com/ -- Clean Pro Gutter Cleaning is highlighting its [heavy-rain gutter guard guidance](#) for New Orleans homeowners as the Gulf Coast enters the heart of summer storm season. The company said the topic deserves local attention because New Orleans combines hurricane exposure, heavy-rain risk, and one of the country's most visible municipal drainage systems.

The National Weather Service's New Orleans/Baton Rouge office was tracking increased heavy-rain and flash-flood risk for the region on June 15, with forecast discussion noting the possibility of several inches of rainfall and locally higher totals along parts of the Gulf Coast corridor. Separately, NOLA Ready says New Orleans faces hurricane-season threats from Atlantic and Gulf storms, and that the area's greatest storm threat occurs during the June 1 through November 30 hurricane season.

New Orleans' local drainage context makes the issue more specific than a generic seasonal reminder. The Sewerage and Water Board of New Orleans explains that the city is built as a series of basins and that parts of New Orleans can fill with water when it rains. The agency says most rainwater is pumped into Lake Pontchartrain through a drainage system that includes 24 drainage pumping stations and 120 drainage and constant-duty pumps.

Clean Pro said that municipal drainage context does not replace homeowner maintenance.

Gutters, downspouts, and gutter guards do not prevent street flooding, storm surge, or hurricane damage. They do determine whether roof runoff moves through the home's roof-edge drainage path or spills over fascia, soffits, siding, landscaping, and foundation-adjacent soil before water ever reaches a street, catch basin, or canal.

"New Orleans is one of the clearest examples of why roof-edge drainage has to be treated as part of storm preparation," said Jonathan D. Byrd I, Founder and Owner of Clean Pro Gutter Cleaning. "City pumps, canals, and flood planning operate at the municipal level. Gutters, downspouts, and guards are the homeowner-level system that decides where roof runoff goes before it reaches the ground."

The company's recent New Orleans-area service-request review shows a timing pattern consistent with what Clean Pro sees ahead of storm season. Among a small but consistent recent sample of New Orleans-area residential quote requesters who answered the cleaning-history

question, most reported more than one year since their last gutter cleaning, and most wanted service as soon as possible or within two weeks. Clean Pro said the figures reflect homeowners who had already initiated a service request and read as service-request behavior, not a survey of all New Orleans households.

The company said the heavy-rain guidance matters because gutter guards are often discussed as a debris product only. In high-rainfall markets, the more practical question is whether a guard design moves water into the gutter during intense rainfall or allows front-edge overflow. Clean Pro's guide explains how screen opening, guard slope, gutter pitch, roof-valley flow, debris load, and downspout capacity affect real-world performance during heavy rain.

Clean Pro Guard - Surgical Stainless Steel Protection

304 surgical-grade stainless steel. The product is installed through Clean Pro's 43-state coordination network and is positioned for homeowners who want debris control without ignoring water-handling performance during rain events.

NOAA's 2026 Atlantic hurricane outlook predicts a below-normal season, but still forecasts 8 to 14 named storms, 3 to 6 hurricanes, and 1 to 3 major hurricanes. Clean Pro noted that seasonal totals matter less to an individual home than a single event: even in a below-normal season, one stalled rain band, tropical storm, or heavy downpour can overwhelm a blocked roof-edge drainage path.

Homeowners can review the company's [New Orleans service availability](#), read the heavy-rain gutter guard guide, or compare the Clean Pro Guard system through the company's website.

About Clean Pro Gutter Cleaning

In business since 2001, Clean Pro Gutter Cleaning, LLC operates as the nation's largest gutter service booking agency, connecting homeowners with vetted, insured professionals across more than 840 cities in 200 metropolitan areas spanning 43 states. Founded by Jonathan D. Byrd I, the company pioneered satellite-based gutter measurement technology in 2012, becoming the first gutter service to eliminate in-person estimates. Clean Pro has coordinated more than 100,000 gutter cleanings and maintains a 4.9-star average rating. Services include professional gutter cleaning, downspout flushing, and installation of the proprietary Clean Pro Guard micro-mesh system built from Type 304 surgical-grade stainless steel. All contractors carry a minimum \$1 million liability insurance and every service includes a 30-day no-clog guarantee.
