

NexusCall AI Reports 100% Call Answer Rate, Recovering \$9,400/Month for Service Businesses

Bilingual AI receptionist Ava answers every call in under 2 seconds, books appointments 24/7 for HVAC, plumbing, and dental businesses.

WEST PALM BEACH, FL, UNITED STATES, June 17, 2026 /EINPresswire.com/ -- WEST PALM BEACH, FL — June 17, 2026 — [NexusCall AI](#), a South Florida-based artificial intelligence company, today announced that its AI-powered receptionist service is delivering a 100% call answer rate for home service and healthcare businesses, recovering thousands in monthly revenue that was previously lost to missed calls.

Most service business owners think they answer 80% of their calls. The data shows it is closer to 60-65%. Every missed call is a customer who hired your competitor."

*Juan Rodriguez, Founder/CEO
of NexusCall AI*

The company's AI receptionist, named Ava, answers inbound calls in under 2 seconds, speaks English and Spanish, books appointments directly into existing scheduling systems, and operates 24/7/365 without breaks, sick days, or hold times.

"Most service business owners think they answer 80% of their calls. The data shows it is closer to 60-65%," said Juan Rodriguez, Founder and CEO of NexusCall AI. "Every missed call is a customer who hired your competitor. We tracked one plumbing company's calls for 30 days and found 47 missed calls — that is over \$9,000 in potential revenue gone in a single month."

According to industry research, 80% of callers who reach voicemail never leave a message and instead call the next business in search results. For service businesses spending \$2,000-\$10,000 per month on Google Ads and SEO, this creates a significant gap between lead generation investment and actual revenue capture.

NexusCall AI integrates with Cal.com, Google Calendar, and major CRM platforms. The service is available in three tiers: Essentials (\$297/month), Growth (\$697/month), and Premium (\$1,497/month).

Rodriguez, a former production manager and HVAC lead technician with 7+ years in the trades, built NexusCall AI specifically for the businesses he watched lose revenue daily to unanswered phones.

"I did not build this from a tech background reading market reports. I built it because I lived the problem. I watched contractors lose jobs every single day because they could not get to the phone while they were on a job site," Rodriguez added.
