

Democratizing Automation by Making RPA Accessible for Mid-Market Businesses

BPX positions RPA as a growth enabler, helping businesses scale efficiently, adapt strategically, and build intelligent, future-ready operations.

DUBAI, DUBAI, UNITED ARAB EMIRATES, June 18, 2026

/EINPresswire.com/ -- BPX is taking a lead role in the RPA discussion by presenting RPA not only as a means to cut costs but also as a tool used for enabling businesses to grow and adapt their strategic plans. BPX is focused on how RPA is helping organizations create scalable, efficient and intelligent operations.

RPA works to automate repetitive, rule-based work across an organization's back-end functions such as, finance, HR and customer service to help organizations minimize errors made by employees while at the same time increasing the speed of completing work and increasing the overall productivity of the organization. In addition to RPA's ability to help organizations complete tasks faster and reduce errors, BPX also places a focus on ensuring RPA is aligned with an organization's long-term goals for automation.

“

Automation should be accessible to every business. We make RPA affordable and scalable, helping mid-market firms boost efficiency and growth.”

Nikhil Agarwal, COO, Business Process Xperts

"There is no longer just about being efficient from the

automation side, however, there is a larger movement towards using automation to help organizations scale better and respond faster to changes in market demand than they ever have before," said Nikhil Agarwal, Founder of BPX. "We at BPX believe that automation is a foundational element in digital transformation. It allows organizations to think ahead, while at the same time continuing to drive operational excellence."

With an emphasis on measurable outcomes, BPX is very hands-on with its clients to identify the best areas in which to [optimize business processes](#), making sure to only deploy RPA processes that produce value for their clients. From ensuring compliance to enhancing customer service, BPX has showcased automation as a competitive advantage for many organizations.

BPX is a leading RPA provider

BPX is dedicated to enabling enterprise transformation while also broadening access to RPA for a wider range of organizations including medium-sized companies, which have historically faced obstacles in their ability to adopt RPA technologies. BPX is helping democratize automation across industries by simplifying the implementation models and offering user-friendly [RPA solutions](#) to organizations.

Creating a new narrative about Automation and the Workforce is important to BPX's vision for RPA. Automation is viewed by BPX as an augmentation of our workforce rather than a replacement of human jobs by technology. Automation will enable employees to move away from repeated tasks allowing them to focus on higher value, more strategic, and more creative aspects of their jobs.

Rupal Agarwal, co-founder of BPX said, "Automation should be viewed as an enabler of human potential rather than a constraint on it." BPX wants to help organizations create an ecosystem that allows technology and talent to come together seamlessly.

BPX also continues to implement various strategies and initiatives that support organization development towards RPA by providing educational outreach, strategic partnerships and RPA solutions that are customized. BPX is supporting all types of organizations as they begin embracing automation as an everyday part of their business, to create a culture of ongoing improvement and digital readiness.

BPX is a digital transformation company
