

Flower Turbines CEO To Visit London Climate Week

Flower Turbines CEO To Visit London Climate Week

LAWRENCE, NY, UNITED STATES, June 18, 2026 /EINPresswire.com/ -- Dr. Daniel Farb, CEO and Founder of [Flower Turbines](#) Inc. and Limited, will be in London during London Climate Action Week 2026.

If you represent a commercial property, campus, organization, etc., that would benefit from Flower Turbines' best-of-kind small vertical axis wind turbine solutions to decrease your electricity bill, contact us on support.uk@flowerturbines.com for more information or to arrange a meeting. Their technology is the one that truly brings small wind into the climate conversation.

market--small wind. Their approach is to target commercial larger properties first with farms of small turbines, then residential, to reduce their electricity bills. They are especially useful for reducing data center effects on the electric grid. The turbines come in sizes for rooftop and ground installation. The following page is dedicated to UK customers:

<https://www.flowerturbines.com/uk>

The CEO, Dr. Farb, said, "Solar power has grown quickly in the UK because it has been available, but a hybrid approach would likely be ideal. Small wind hasn't caught on to this point, but our technology can change that. It's a windy country with limited space, and we have the answer."

Flower Turbines makes small wind turbines that are special in many ways. They are elegant, noiseless, efficient, bird-friendly, endure high speeds, and start at low speeds. The invention that makes them the most cost and space-efficient choice for a small vertical axis wind turbine is their patented "cluster" or "bouquet" effect; when placed close together properly, each one added to a group makes the whole group perform better. As few as 4 turbines together produce the electricity of 8 separate turbines.

Potential customers can contact Flower Turbines at support.us@flowerturbines.com except for the EU at support.eu@flowerturbines.com and the UK at support.uk@flowerturbines.com.

Flower Turbines, Inc. has external validation as a top company:

- Chosen for the UK Government's Global Entrepreneurship Program
- Awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the

This shows how each turbine produces more energy as another turbine is clustered. 5 Flower Turbines together produce 228% more power than 5 separate turbines.
