

Flower Turbines To Exhibit at Reset Connect London 2026

Flower Turbines To Exhibit at Reset Connect London 2026

LONDON, UNITED KINGDOM, June 19, 2026 /EINPresswire.com/ -- [Flower Turbines](#) will exhibit at Reset Connect London 2026, taking place 23 to 24 June 2026 at ExCeL London.

Reset Connect London is part of London Climate Action Week, bringing together people and organisations focused on practical solutions for net zero.

Dr. Daniel Farb, CEO and Founder of Flower Turbines, will also be speaking during the startup pitching session at the London & Partners Pavilion on June 23, 2026 at 12:30 pm. Their booth is LP18 and they will be especially glad to talk to those interested in the best small vertical axis wind turbine in the [UK](#), for example, Solar PV project developers interested in incorporating wind energy Owners of real estate, such as factories, data centers, farms, and buildings, interested in saving money and carbon Governments about renewable infrastructure Investors interested in SEIS investing Corporate ESG and sustainability

Flower Turbines makes high performance small vertical axis wind turbines. They perform well land can often be integrated with existing solar installation.

The company intends to supply the UK with a missing link in the renewables market--small wind. Their approach is to target commercial larger properties first with farms of small turbines, then residential, to reduce their electricity bills. They are especially useful for reducing data center effects on the electric grid. The turbines come in sizes for rooftop and ground installation. The following page is dedicated to UK customers: <https://www.flowerturbines.com/uk>

The CEO, Dr. Farb, said, "Solar power has grown quickly in the UK because it has been available, but a hybrid approach would likely be ideal. Small wind hasn't caught on to this point, but our technology can change that. It's a windy country with limited space, and we have the answer."

Flower Turbines makes small wind turbines that are special in many ways. They are elegant, noiseless, efficient, bird-friendly, endure high speeds, and start at low speeds. The invention that makes them the most cost and space-efficient choice for a small vertical axis wind turbine is their patented "cluster" or "bouquet" effect; when placed close together properly, each one added to a group makes the whole group perform better. As few as 4 turbines together produce

the electricity of 8 separate turbines.

Flower Turbines, Inc. has external validation as a top company:

- Chosen for the UK Government's Global Entrepreneurship Program
- Awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the Solar Impulse website: <https://solarimpulse.com/efficient-solutions/wind-tulips#>
- A winner of Pepperdine Graziado Business School's annual Most Fundable Companies in America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined.
- Winner of the Dutch government sustainability award for two separate years.
- A winner of the 2023 Yes San Francisco clean technology competition for top technologies to implement in San Francisco in association with the World Economic Forum
- The CEO was chosen as a 2021 innovator of the year by the US Department of Energy Impel+ program.
- Chosen by US Department of Housing and Urban Development for its Innovation Showcase on the Washington Mall
- Winner of many other awards
