

Flower Turbines selected for Pitch & Invest at Reset Connect London 2026

Flower Turbines selected for Pitch & Invest at Reset Connect London 2026

LONDON, UNITED KINGDOM, June 22, 2026 /EINPresswire.com/ -- [Flower Turbines](#) has been selected to take part in the live Pitch & Invest Competition at Reset Connect London 2026.

Dr. Daniel Farb, CEO and Founder of Flower Turbines, will represent the company in the Day 2 Energy PT 2 on June 24 from 12:00 to 12:55 at the Pitch & Invest Stage.

This is an exciting opportunity to learn about Flower Turbines for investors, innovators and clean energy leaders who are looking for practical climate technologies with real world commercial potential.

Their booth is LP18 and they will be especially glad to talk to those interested in the best small vertical axis wind turbine in the UK, for example, Solar PV project developers interested in incorporating wind energy Owners of real estate, such as factories, data centers, farms, and buildings, interested in saving money and carbon Governments about renewable infrastructure

Flower Turbines at Reset Connect

Bouquet of Wind Tulip Turbines

Investors interested in SEIS investing
Corporate ESG and sustainability
managers

Flower Turbines makes high
performance small vertical axis wind
turbines for commercial rooftops,
business parks, campuses, industrial
sites, ports, car parks and open land.

For commercial wind projects, Flower
Turbines turns unused space into
energy.

They are elegant, space-efficient
turbines that perform best at close
range.

Flower Turbines also supports the
future of rooftop wind turbines, onsite
generation and local clean energy
solutions for the UK and beyond.

Flower Turbines makes high performance small vertical axis wind turbines. They perform well
land can often be integrated with existing solar installation.

The company intends to supply the UK with a missing link in the renewables market--small wind.

The Cluster Effect

Average Watts Per Small Wind Turbine at 10m/s

This shows how each turbine produces more energy
as another turbine is clustered. 5 Flower Turbines
together produce 228% more power than 5 separate
turbines.

Flower Turbines at Rotterdam Roof Days

Their approach is to target commercial larger properties first with farms of small turbines, then residential, to reduce their electricity bills. They are especially useful for reducing data center effects on the electric grid. The turbines come in sizes for rooftop and ground installation. The following page is dedicated to UK customers: <https://www.flowerturbines.com/uk>

The CEO, Dr. Farb, said, "Solar power has grown quickly in the UK because it has been available, but a hybrid approach would likely be ideal. Small wind hasn't caught on to this point, but our technology can change that. It's a windy country with limited space, and we have the answer."

Flower Turbines makes small wind turbines that are special in many ways. They are elegant, noiseless, efficient, bird-friendly, endure high speeds, and start at low speeds. The invention that makes them the most cost and space-efficient choice for a small vertical axis wind turbine is their patented "cluster" or "bouquet" effect; when placed close together properly, each one added to a group makes the whole group perform better. As few as 4 turbines together produce the electricity of 8 separate turbines.

Flower Turbines, Inc. has external validation as a top company:

- Chosen for the UK Government's Global Entrepreneurship Program
- Awarded the "Solar Impulse Efficient Solution" Label, a proof of high standards in profitability and sustainability to protect the environment. Here is a link to the page about Wind Tulips on the Solar Impulse website: <https://solarimpulse.com/efficient-solutions/wind-tulips#>
- A winner of Pepperdine Graziado Business School's annual Most Fundable Companies in America list. Flower Turbines was judged to be in the top 10 among 4500 startup companies examined.
- Winner of the Dutch government sustainability award for two separate years.
- A winner of the 2023 Yes San Francisco clean technology competition for top technologies to implement in San Francisco in association with the World Economic Forum
- The CEO was chosen as a 2021 innovator of the year by the US Department of Energy Impel+ program.
- Chosen by US Department of Housing and Urban Development for its Innovation Showcase on the Washington Mall
- Winner of many other awards
