Maxx Lionesz's AI Prompts for Life Series Shows Readers How to Use AI for Business, Wealth, Mindset, and Legacy Building

“

AI should not feel
intimidating or out of
reach.”

Maxx Lionesz

Designed for entrepreneurs, professionals, families, creators, and lifelong learners, the six-book series demonstrates how AI can be applied to some of life's most important areas, from building businesses and automating workflows to improving financial clarity, strengthening emotional resilience, protecting loved ones through estate planning, and creating a meaningful legacy. Rather than focusing on technology alone, each book combines beginner-friendly instruction with hands-on

exercises that help readers move from curiosity to confident action.

The series includes AI Prompts for Life: Launch Lab Prompts to Spark Entrepreneurial Ideas and Monetize With Purpose, which guides readers through business ideation, niche discovery,

market validation, side-hustle planning, and AI-assisted monetization.

AI Prompts for Life: ChatGPT Prompts to Build No-Code AI Tools That Automate, Scale & Serve Others focuses on building practical no-code AI workflows, prompt chains, automation systems, AI agents, and business tools using platforms such as ChatGPT, Zapier, Airtable, Notion, Gmail, and Slack.

In AI Prompts for Life: Create Your Will, Trusts, and Estate Plan in Hours Using ChatGPT – Protect Your Family For Less, readers are guided through estate-planning basics, asset organization, digital legacy planning, wills, trusts, letters of instruction, and first-draft preparation for professional legal review.

AI Prompts for Life: Build Inner Power, Clarity & Emotional Mastery with Daily Mindset Prompts helps readers use daily AI prompts for self-leadership, emotional regulation, confidence, boundaries, stress management, reflection, and personal growth.

For those focused on money, AI Prompts for Life: Daily Prompts for Wealth Clarity, Smart Decisions & Financial Freedom offers prompts and exercises for budgeting, cash flow, debt payoff, emergency funds, risk assessment, investment evaluation, and smarter financial habits.

The purpose-driven title, AI Prompts for Life: Legacy Vision Prompts to Craft a Life of Meaning, Impact, and Abundance, helps readers clarify values, create a legacy vision, design meaningful goals, align daily action with long-term purpose, and measure personal or professional impact.

Across the series, Lionesz incorporates his BE R.E.A.L. philosophy, blending mindset development, prompt engineering, accountability, and practical action. Instead of presenting AI as a complex technology reserved for experts, the books make prompting accessible, personal, and immediately useful.

“My goal with this series is to give people prompts and exercises that help them think clearly, act confidently, and use ChatGPT as a real partner in building the life, business, and legacy they want,” said Maxx Lionesz in a recent interview.

At a time when AI literacy is becoming increasingly valuable in both personal and professional settings, the AI Prompts for Life series provides a practical roadmap for applying these tools with purpose. Through hundreds of carefully crafted prompts, templates, reflection exercises, and implementation strategies, readers learn how to use AI intentionally, ethically, and effectively to create measurable results in the areas that matter most.

The AI Prompts for Life series is suited for readers ready to move beyond experimentation and begin using AI as a daily tool for transformation, productivity, decision-making, and long-term success.
