

VendorAbuse.com Launches API Complaint Launcher — First CRM-to-Complaint Integration for Trade Contractors

JACKSONVILLE, FL, UNITED STATES, June 21, 2026 /EINPresswire.com/ -- VendorAbuse.com, the consumer and vendor complaint platform that pioneered voice-to-text complaint filing and AI-powered audio explainers, today announced the launch of the [API Complaint Launcher](#) — the first tool that lets trade contractors file public complaints directly from their existing CRM software.

The Problem: Friction Kills Accountability

When a homeowner stiffes a roofer, a general contractor ghosts on a draw, or an insurance adjuster reverses an approved claim, the contractor rarely has time to sit down, open a browser, and type out a formal complaint. They're on a roof, in a crawl space, or driving to the next job.

"The biggest barrier to accountability isn't willingness — it's friction," said Dave Williams, founder of VendorAbuse.com and Proxy1Media LLC. "Contractors want to warn others. They just don't have 15 minutes to do it. We eliminated the last barrier between getting burned and creating a permanent public record."

How the API Complaint Launcher Works

The API Complaint Launcher is a secure REST API endpoint that connects directly to any CRM, job management platform, or workflow automation tool that supports HTTP POST requests or webhooks.

Compatible platforms include JobNimbus, AccuLynx, Housecall Pro, ServiceTitan, Salesforce, HubSpot, Zoho CRM, Monday.com, and automation tools like Zapier and Make.com (formerly Integromat).

Setup involves a one-time configuration: mapping existing CRM fields — company name, address, phone number, dollar amount, job notes — to the API's input parameters.

Once configured, a single button click or workflow trigger in the contractor's existing tool fires a complaint to VendorAbuse.com in under two seconds.

The posted complaint is immediately:

“

The biggest barrier to accountability isn't willingness — it's friction. Contractors want to warn others. We eliminated the last barrier between getting burned and creating a permanent public record.”

Dave Williams

- Published as a permanent public web page
- Indexed by Google and other search engines
- Searchable by company name, address digits, and phone number (via VendorAbuse.com's proprietary SearchBy4 system)
- Linked to the company's aggregated profile page on VendorAbuse.com

Three Severity Levels

The API supports three escalation tiers, allowing contractors to calibrate their response to the situation:

- Level A — Warning Shot: For slow payments, ignored calls, or minor scope disputes. Often enough to trigger a callback within 48 hours.
- Level B — Escalation: For broken contracts, 30+ days of non-payment, or pattern-of-behavior situations. Full complaint with dollar amounts and dispute outcome badges.
- Level C — Full Public Record: For total fraud, theft, safety violations, or serial offenders. Maximum visibility including potential blog coverage and alert notifications.

Pricing

The API Complaint Launcher uses a simple monthly subscription model with no per-complaint fees:

- One-time setup: \$249.99
 - Starter: \$19.95/month — up to 20 complaints
 - Pro: \$39.95/month — up to 40 complaints (most popular)
 - Enterprise: \$99/month — up to 100 complaints
- No annual contracts. Cancel anytime.

Who It's Built For

The tool targets trade professionals who manage high volumes of leads where a percentage inevitably go sideways:

- Roofing contractors dealing with insurance claim disputes and homeowners who disappear after the roof is on
- General contractors chasing draws from developers or getting stiffed on change orders
- Plumbers, electricians, and HVAC techs who provide free diagnostics only to be told "we went with someone cheaper"
- Subcontractors getting squeezed by GCs who take the money and don't pay down
- Property maintenance companies dealing with management companies that string vendors along
- Landscapers and tree service companies where handshake deals go south

About VendorAbuse.com

VendorAbuse.comSM is a product of Proxy1Media LLC, headquartered in Jacksonville, Florida and founded in 2011. The platform serves both consumers and trade professionals, offering tools including voice-to-text complaint filing, AI-powered audio explainers, the SearchBy4 phone/address lookup system, and now CRM-integrated API [complaint launching](#). VendorAbuse.com is the only complaint platform that actively serves the contractor side of disputes — [giving trade pros the same public accountability tools](#) that consumers have long enjoyed on platforms like BBB, Yelp, and Google Reviews.
