

3D Graphene Market is Projected as the Fastest Growth Opportunities by 2031

The global 3d graphene market is projected to reach \$39.1 million by 2031, growing at a CAGR of 31.6% from 2022 to 2031.

WILMINGTON, DE, UNITED STATES, June 22, 2026 /EINPresswire.com/ --

Allied Market Research published a report, titled, "[3D Graphene Market](#) by Application (Composites, Sensors, Energy storage, Others): Global Opportunity Analysis and Industry Forecast, 2021-2031." The report offers

a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario.

3D GRAPHENE MARKET
OPPORTUNITIES AND FORECAST, 2021 - 2031

3d graphene market is expected to reach **\$39.1 Million** in 2031

Growing at a **CAGR of 31.6%** (2022-2031)

Report Code: A53670, www.alliedmarketresearch.com

3D Graphene Markets Demand

3D Graphene Industry Growth Statistics:

According to the report, the global 3D graphene industry generated \$2.5 million in 2021 and is expected to generate \$39.1 million by 2031, witnessing a CAGR of 31.6% from 2022 to 2031.

Leading Market Players:

Integrated Graphene Ltd.

Ultrananotech Private Limited.

Graphex Group

NANOCHEMAZONE

G6 Materials Corp.

AMERICAN ELEMENTS

ACS Material

Nano Dimension

Lyten, Inc.

CVD Equipment Corporation

The report analyzes these key players in the global 3D graphene market. These players have adopted various strategies such as expansion, new product launches, partnerships, and others to increase their market penetration and strengthen their position in the industry. The report helps determine the business performance, operating segments, developments, and product portfolios of every market player.

Drivers, Restraints, and Opportunities

The rise in the demand for graphene in the electronics sector owing to its excellent electrical mobility and permeability, the surge in the use of graphene in the energy industry, the increasing purchasing power of consumers and the rising consumer demand for electronic products, such as tablets and mobile phones drive the global 3D graphene market. However, the toxic nature of graphene, risks involved in the graphene production, and the high production cost of graphene restrain the market growth. Moreover, the increased usage of 3D graphene in the healthcare sector will present new growth opportunities for the global 3D graphene market in the coming years.

KEY FINDINGS OF THE STUDY

On the basis of application, the energy storage segment was the largest revenue contributor in 2021 and is anticipated to register the highest CAGR of 31.8% during the forecast period.

On the basis of region, the Asia-Pacific segment was the largest revenue contributor, in 2021 and is anticipated to register the highest CAGR of 31.9% during the forecast period.

The energy storage segment to grab lion's share during the forecast period

In terms of application, the energy storage segment contributed to the largest share of more than two-fifths of the global 3D graphene industry in 2021 and is expected to maintain its leadership in terms of revenue during the forecast period. Also, the same segment is projected to witness a fastest CAGR of 31.86% from 2022 to 2031. The growth is attributed to the properties of 3D graphene like high conductivity, high resistance, and others. The report also discusses composites, sensors, and others segments.

Asia-Pacific to achieve the largest revenue by 2031

Based on region, Asia-Pacific held the highest market share in terms of revenue in 2021, accounting for nearly two-fifths of the global 3D graphene market and is likely to dominate the market during the forecast period. The same region would portray the highest CAGR of 31.9% from 2022 to 2031. This is due to the highly developed electronic sector in China and the continuous investments done in the region through the years to advance the electronic sector. The report also analyzes markets in North America, Europe, and LAMEA regions.
