

Venezuela Energy Week 2026 Launches High-Impact Deal Room to Accelerate Energy Investment and Transactions

CARACAS, VENEZUELA, June 22, 2026

[/EINPresswire.com/](https://EINPresswire.com/) -- [Venezuela Energy Week](#) 2026 has announced the launch of its Deal Room, a dedicated transaction-focused platform designed to facilitate investment, strategic partnerships and project financing across Venezuela's evolving energy sector.

Taking place alongside the event in Caracas from October 26–29, the Deal Room will convene government representatives, national and international oil companies, investors, private equity firms, financial institutions, service providers and project developers within a structured environment focused on accelerating deal-making.

The platform moves beyond traditional networking formats, operating instead as a curated commercial interface where stakeholders engage directly on defined investment opportunities across upstream oil and gas, natural gas monetization, refining, downstream infrastructure, energy services and emerging technologies.

The launch comes amid renewed momentum in Venezuela's energy sector, as the country continues efforts to rebuild production capacity and attract international capital into one of the world's most resource-rich hydrocarbon basins. With the largest proven oil reserves globally and significant natural gas potential, Venezuela remains a focal point for international energy investors assessing re-entry and expansion opportunities.

Recent developments highlight growing engagement across the sector. PDVSA has strengthened cooperation with international partners including Repsol, following agreements to increase production and optimize operations at key assets such as Petroquiriquire. In parallel, Shell, Eni, Chevron and SLB have advanced collaboration frameworks spanning offshore gas

developments, heavy oil production and operational modernization initiatives aimed at improving efficiency and output.

These developments reflect a broader shift toward partnership-led development models in Venezuela's upstream sector, with joint ventures, production-sharing structures and technical collaborations increasingly central to unlocking value across mature and undeveloped assets.

"The Deal Room has been designed to turn interest into structured investment outcomes," said James Chester, CEO of Energy Capital & Power. "It creates a focused environment where capital providers, operators and project sponsors can engage directly on opportunities and move conversations toward execution."

Participants will gain access to a structured meeting program enabling direct engagement with asset owners, operators, government officials and financing partners. The platform will support a range of commercial outcomes, including equity participation, asset acquisitions, joint ventures, service agreements and offtake arrangements.

With interest in Venezuela's energy sector continuing to grow, the Deal Room is positioned as a dedicated mechanism for aligning capital with opportunity and accelerating the path from engagement to transaction.

Participate in the VEW 2026 Deal Room

Companies interested in participating in the Deal Room – including project submissions, investment opportunities or partnership inquiries – can apply or get in touch via the official Venezuela Energy Week platform:

- Submit a project / investment opportunity: [[Submit Here](#)]
- General enquiries & registration: [[Contact Us](#)]
