

# forms.app Removes Form Response and Team Member Limits from Free Plan

*The form builder now offers unlimited form responses and team member invites to its free users.*

LONDON, LONDON, UNITED KINGDOM, June 23, 2026

[/EINPresswire.com/](https://EINPresswire.com/) -- [forms.app](https://forms.app), an online form builder used by teams and businesses worldwide, today announces its updated free plan. Effective immediately, all free users can collect unlimited responses, collaborate with an unlimited number of team members, and access the platform's advanced suite of features, such as AI form generation, conditional logic, e-signatures, PDF generation, and all 30+ field types.

## The problem with free plans

Looking at the data, we found that response and member limits are not major expense drivers. We removed response and member limits to offer a free plan that's usable without upgrade pressure. "

*Tolga Kizilkaya*

The form builder apps, as is the case in most software categories, have long been defined by artificial scarcity. The pricing plans restrict free users to as few as 10 responses per month, forcing teams to upgrade before they can validate whether the tool fits their workflow.

Today, most form builders offer 100 responses on their free plan, with some going as low as 10. Those who offer unlimited responses were simple tools that justified their basic feature set with a generous free plan. And team collaboration features are almost always locked behind a paid plan, even custom enterprise plans.

forms.app's data showed that small businesses, mid-size teams, and non-profits needed the team collaboration the most, but are cautious about spending more or paying for each team

member. As of June 2026, forms.app changes its pricing to offer a capable solution to teams of all sizes, with modern form building, rich capabilities, free team collaboration capabilities, and unlimited responses.

What changes for forms.app users?

The updated free plan now includes:

- Unlimited responses: Collecting and storing form submissions with no monthly cap.
- Unlimited team members: Inviting team members with granular role-based access controls

What stays the same:

- Full field library: Access to all 30+ field types, including payment collection, e-signatures, file uploads, and more.
- AI-powered tools: AI form generator, AI insights, AI question helper, and AI option generator.
- Conditional form logic: Conditional logic, pre-filled forms, and auto-scoring.
- Form analytics: drop-off analysis, partial responses, custom PDF generation
- Native integrations: Over 20 native integrations and hundreds 3rd party integrations.

forms.app explain the [pricing update](#) in detail and it's possible to see the current plans on the [forms.app's pricing page](#).

About forms.app

forms.app is an online form builder designed for team collaboration and enables collecting responses with no monthly limits. It combines an intuitive drag-and-drop editor, modern aesthetics, and accessibility into a single platform.
