

Green Lotus launches advanced AI Agentic Team to boost eCommerce & Local Business Sales

TORONTO, ONTARIO, CANADA, July 7, 2026 /EINPresswire.com/ -- Green Lotus has officially launched a specialized team of four AI agents designed to automate lead qualification and customer service for local businesses and e-commerce companies. This [AI Agent for Sales](#) operates 24/7 to ensure companies never miss a sales opportunity across phone calls, SMS, and social media platforms.

The window for capturing a lead has narrowed to minutes. According to PATLive and research featured by the Forbes Business Council, 85% of callers who reach a standard voicemail will not leave a message or call back—they simply move to the next competitor.

Traditional business operations are bleeding revenue through "leaky buckets"—missed calls and slow responses that drive customers to competitors. In today's "AI or DIE" market, failing to respond within five minutes is essentially subsidizing your competition.

You either adapt to AI or your business might not survive,”

Harvard research confirms AI agents are the solution:

- Productivity: Harvard/BCG found AI users complete 12.2% more tasks, 25% faster, with 40% higher quality.
- Efficiency: HBS shows AI increases resolutions by 14% per hour.
- Response: AI agents provide the instant engagement

demanded by the 77% of consumers who prioritize speed.

Waiting to adapt isn't a delay; it's a liquidation of your market share.

Businesses that respond to new leads within 5 minutes — instead of 30 minutes- can be up to 100X more likely to connect with that lead, significantly increasing their opportunities to convert prospects into customers. (Source: Harvard Business Review)
