

Atheer Announces Summer 2026 Webinar: AI Intelligence for Frontline Operations

SANTA CLARA, CA, UNITED STATES, June 25, 2026 /EINPresswire.com/ -- [Atheer](#), a leader in frontline work execution for industrial enterprises, is hosting a live 30-minute webinar to unveil the next generation of its Work Execution Platform.

ATHEER

The centerpiece is Atheer AiR Intelligence™ — an agentic AI layer purpose-built for the industrial frontline. The release targets the gap that operations, maintenance, quality, HSE, and compliance leaders know well: enterprise systems assign and track work, but the last mile — where work is actually executed — remains disconnected, undocumented, and exposed.

The webinar covers four significant advances:

- AiR Intelligence for Frontline Operations — AI agents that go beyond AI data to generate procedures and validate execution at the moment work gets done
- Hyper-Intelligent Document Automation — AI transforms paper-heavy workflows into verified digital processes, saving 100+ hours per month
- Best-in-Class Governance Controls — intelligent approvals, compliance controls, and audit-ready documentation that strengthen execution discipline
- New partnerships, enhancements, and innovation surprises

The live webinar takes place Tuesday, July 22 at 8:00 AM PT | 3:00 PM GMT, with practical use cases, a live Q&A, and a prize drawing.
