Software Inc*

Software, Inc. announced it has achieved AWS Advanced Tier Services Partner status within the Amazon Web Services Partner Network (APN). This milestone reflects CyberTech’s proven AWS expertise, certified professionals, and consistent success in delivering secure, scalable solutions on the AWS Cloud.

AWS Advanced Tier status is awarded to partners that have demonstrated deep AWS knowledge, real-world deployment experience, and measurable customer outcomes across AWS-hosted workloads. The designation reinforces CyberTech’s ability to help enterprises migrate,

modernize, and run demanding workloads on AWS with greater speed, lower risk, and enterprise-grade security.

“Our largest clients trust AWS with their most critical GIS workloads, and Advanced Tier status reflects the depth CyberTech brings to running them with confidence”, said Vish Tadimety, CEO at CyberTech Systems and Software Inc. “The magic is in the pairing, where AWS brings cloud reach and resilience, ArcGIS brings intelligence, and CyberTech brings GIS depth that is second only to Esri. From mission-critical network management to parcel fabrics, we bring cloud, data, and AI together so customers can turn location into faster, smarter decisions.”

As an AWS Advanced Tier Services Partner, CyberTech strengthens how it aligns cloud strategy, solution architecture, deployment, and managed operations into a single modernization roadmap. The recognition also widens CyberTech’s reach across ArcGIS Managed Services, Utility Network Management, digital twins, AI and data fabrics, and SAP Business Data Cloud integration, helping customers tie location intelligence to core business data and draw more value from every system they run.

CyberTech’s products and services are also available on AWS Marketplace, giving customers a

streamlined path to procure and deploy ArcGIS cloud and SAP solutions.

About CyberTech Systems and Software, Inc.

CyberTech Systems and Software, Inc. is an Esri Platinum Partner with approximately 300 GIS resources specializing in ArcGIS Managed Services. With Esri GIS Cloud Specialty and GIS Network Management Specialty certifications, as well as more than 25 years of Esri partnership experience, CyberTech delivers enterprise ArcGIS solutions for utilities, railroads, and government sectors. The company partners with Microsoft and AWS, enabling comprehensive ArcGIS Enterprise implementations across leading hyperscaler platforms. For more information, visit www.cybertech.com
