

Dreams USA Offers First Look at Vision Inspired by the American Dream Through Newly Launched Website

CANYON LAKE, CA, UNITED STATES, July 1, 2026 /EINPresswire.com/ -- July 1, 2026 – Dreams USA has unveiled plans for a destination experience designed to bring America’s history to life through immersive attractions, interactive technology, hospitality, entertainment, and education.

The vision for Dreams USA, introduced on America’s 250th birthday and now showcased through the organization’s new website, is to create an engaging destination where visitors can explore the people, cultures, events, and ideals that have shaped the nation while inspiring future generations to pursue their own dreams.

“America is a place where dreams become reality through perseverance and opportunity,” said David B. Dringman, Founder of Dreams USA. “Dreams USA is being created to celebrate that legacy, honor those who came before us, and inspire future generations to carry those ideals forward.”

“We believe there is a growing need for experiences that bring people together around a shared understanding of America’s history,” said Randy Crew, Co-Founder of Dreams USA. “Dreams USA is an opportunity to honor the people, principles, and sacrifices that shaped our nation, while encouraging a greater understanding and appreciation of the freedoms and opportunities that continue to define the American story.”

At its core, Dreams USA is envisioned as a place where visitors can engage with the stories, people, and defining moments that have shaped the nation. Through innovative technology and meaningful storytelling, the project aims to create experiences that educate, inspire, and connect guests to America’s past while encouraging them to dream about their future. Most museums preserve the stories of those who came before us. Dreams USA is different because it celebrates

and honors the dreams of those we've lost, while empowering the dreams of those who are still writing their stories today.

The new website highlights several planned experiences, including Wings of America, the Freedom Foyer, interactive 3D exhibits, virtual reality experiences, AI-powered interactive experiences, live conversations with historians, beautifully designed gardens, and an immersive Dreams Grand Theater. By incorporating virtual reality and artificial intelligence alongside immersive storytelling, Dreams USA aims to create engaging new ways for visitors to connect with America's history.

"It is an honor for Uniquely Driven to be part of a project with the vision of Dreams USA," said Yanick Dalhouse, Founder of Uniquely Driven. "Projects of this magnitude are rare, and Dreams USA has the potential to not only showcase history, but to become part of it. We are excited to help support a vision that can inspire and impact future generations."

In addition to its educational and cultural offerings, Dreams USA will bring together hospitality, recreation, and entertainment through plans for a luxury hotel, championship golf course, fine dining experiences, premier event spaces, and an aviation-themed live music and entertainment venue.

"Our goal is to create an experience that inspires visitors of all ages while honoring the values and sacrifices that helped build this country," added Dringman. "Every element of Dreams USA is rooted in the belief that understanding our history helps us appreciate the opportunities and freedoms we enjoy today."

Visitors can explore the newly launched website to learn more about the vision, mission, and future of Dreams USA.
