

NCWaterHeaters.com Educates Triangle Homeowners on Essency Water Heaters as Demand Grows for Energy-Efficient Solutions

NCWaterHeaters.com has launched a dedicated educational resource to help Triangle homeowners learn more about Essency water heaters.

RALEIGH, NC, UNITED STATES, July 1, 2026 /EINPresswire.com/ -- The Essency EXR uses a unique system. Instead of storing and reheating the water like a traditional tank, it keeps a reserve of heated water inside a protected core then transfers that heat to fresh water only when you turn on the tap.

A Smarter Electric Water Heater Solution -
NCWaterHeaters.com

“

Traditional tanked and tankless water heaters are not the only options. Our goal is to educate customers so they can make the best decision for their home, budget, and hot water needs.”

Dave Noffsinger, Master Plumber & Owner

Solution for Homes Without Natural or Propane Gas

Many homeowners are interested in the benefits of a tankless water heater, but not every home has access to natural gas or propane. While electric tankless water heaters may seem like an alternative, they often require significant and costly electrical upgrades to operate effectively. The Essency water heater offers an electric solution designed to provide many of the advantages homeowners associate with gas-powered tankless systems, including strong efficiency, extended hot water performance, and smart technology, without requiring gas service to the home.

Longer Lifespan and Warranty

Most water heaters tap out after 8-12 years; even standard tankless models fail around 20. Essency water heaters are made from advanced polymer materials that resist corrosion and wear.

And since water is heated via a heat exchanger rather than traditional elements, there's less sediment buildup and cleaner operation, all of which equals a lifespan of 30+ years. It comes with a 20-yr leak-proof warranty that is transferable to new owners.

Feature	Traditional Gas/Electric Tank	Gas Tankless	Hybrid Heat Pump	Essency EXR
Best For	Basic water heating, short term solution, limited budget	Homes wanting endless hot water and energy savings with a long term solution, homes with natural gas or LP	Homeowners focused on maximum efficiency	High demand of hot water, long term solution, electric only option
Heating Power	Standard dual elements, NG, or LP	On-demand heating	Heat pump with electric backup elements	High output heat exchanger
Hot Water Output	Limited first hour hot water output	Virtually unlimited when sized correctly	Slower recovery when in heat pump mode, higher output than traditional electric tank in performance mode	High output with up to 100-gallon first-hour rating
Ideal Household	2-4 people (typical usage)	Unlimited with proper sizing	Up to 2-4 people (typical usage)	4+ people or heavy simultaneous use
Installation	Standard replacement install must meet current codes	Professional installation and possible gas/electrical upgrades	Requires adequate space, airflow, and professional installation	Professional installation
Typical Installation Cost	\$1,600-\$3,600	\$3,800-\$7,800	\$3,500-\$5,500	\$4,200-\$5,400
Summary	Limited hot water, lowest upfront cost, shortest lifespan, highest operating cost, average maintenance	Endless hot water, high efficiency, highest upfront cost, long-term solution, more complex maintenance	High efficiency, average lifespan, limited hot water, fastest ROI, average maintenance	Longest life expectancy, longest warranty, high output, least maintenance

* Typical installation costs shown are general estimates and may vary based on equipment selection, code requirements, utility upgrades, permit requirements, and installation conditions.

Handles the Hot Water Demand of your Entire Household

With an 80-gallon first hour rating and capability to produce up to 100 gallons FHR, the EXR delivers enough hot water for all your family's demands, the equivalent of 7+ back-to-back showers without that dreaded mid-shower temperature drop.

Go ahead and run your laundry, dishwasher, and take a relaxing tub soak... all at the same time with no need to schedule an appointment with your hot water heater again!

Smart Technology

The Essency is WiFi-enabled and features both a touchscreen and mobile app, allowing you to fine-tune your system on demand with convenient modes such as Vacation, Boost, Water Saver, Heat+, and Battery Back-up. It can also provide early alerts and system updates designed to help you monitor performance and extend the life of your unit.
