Up-to-date document analysis is especially important for investors buying in the secondary market. They typically need to gain a rapid understanding of the flexibility of a CLO before making a purchase decision. They also need to know that the analysis is based on the current version of the deal's documentation.

"Our research team has done a fantastic job in reaching this important milestone," says Dealscribe CEO Mike Peterson. "Dealscribe's huge library of documents and research plays an important part in making the CLO market ever more liquid and accessible."

The table shows the number of active deals for the largest US broadly syndicated CLO managers at 31 May 2026.
