CANNES, PROVENCE-ALPES-CÔTE D'AZUR, FRANCE, July 6, 2026 /EINPresswire.com/ -- FOR IMMEDIATE RELEASE

Dr. [Timothy Adams](#), DDS, was invited as a guest participant to a three-day series of events in Cannes last month, including programming associated with the sHEALed documentary red carpet premiere and curated events connected with Biohack Yourself Mag. His participation placed him among a select group of health, wellness, and innovation leaders contributing to international conversations around human performance, longevity, and regenerative health.

Dr. Adams' presence at Cannes reflects growing global interest in integrative dental and structural health approaches that connect oral function with whole-body systems and performance optimization.

He is also set to appear in the upcoming documentary "[ByeOldDentistry](#)", which highlights innovators redefining modern dentistry through structural, neurological, and whole-body approaches to oral health.

A Whole-Body Approach to Dental Innovation

Dr. Adams is recognized for his advanced clinical philosophy that positions dentistry as an integral component of cranial, airway, and full-body function. His work focuses on how oral structure influences posture, breathing, nervous system regulation, and overall physiological balance.

At the core of his approach is a custom oral appliance system, including his patent-pending device, designed to work continuously with the body's natural adaptive mechanisms.

The device is designed to:

- Develop and widen the arches of the mouth to create more space for the tongue
- Support release of tension patterns within cranial and jaw structures
- Reduce oral and structural restrictions that may affect functional balance
- Support improved regulation of the nervous system through structural alignment
- Enhance the body's innate capacity for adaptation and recovery
- Improve motion with blood, lymphatic and glymphatic flow.

Dr. Adams' clinical model emphasizes that oral and cranial structure can influence broader systemic function, including sleep quality, breathing efficiency, posture, and overall energy regulation.

International Media & Industry Recognition

Dr. Adams' upcoming feature in "ByeOldDentistry" reflects growing international attention toward integrative dental models that bridge oral health and whole-body wellness.

His work has also been associated with leading voices and publications in the biohacking and human optimization space, including Biohack Yourself Magazine, which highlights innovators advancing the future of health and performance medicine.
