

Casper Prepares for Expanded US Availability

Casper is preparing to expand U.S. access as it advances its roadmap for real-world assets and enterprise blockchain.

ZUG, SWITZERLAND, July 1, 2026

/EINPresswire.com/ -- [Casper](#) is

preparing to expand availability to the

U.S., a move expected to open the network to a broader domestic audience in one of the world's most important digital asset markets.

The anticipated expansion comes as Casper continues to build around enterprise and institutional use cases, including real-world asset tokenization, compliant digital asset infrastructure, and emerging machine-to-machine payment applications.

Expanded U.S. availability is an anticipated milestone for the Casper community and marks the beginning of an important new chapter for the ecosystem."

Michael Steuer

The U.S. availability milestone is expected to be the first in a broader July update sequence covering market access, validator network growth, staking participation, institutional adoption, and infrastructure for real-world asset markets.

[Sarson Funds](#), which provides digital asset education and market access research, views the anticipated U.S. availability expansion as an important step toward broader participation in the Casper ecosystem.

"Expanded U.S. availability has been one of the most anticipated milestones for the Casper community," said Michael Steuer, President and CTO at Casper. "This represents the beginning of an important new chapter for the ecosystem, and we look forward to sharing more details in the coming weeks."

Casper encourages community members, institutions, developers, and ecosystem participants to follow official Casper channels for forthcoming announcements throughout July.

ABOUT CASPER

Casper Network (CSPR) is a Layer 1 Proof-of-Stake blockchain engineered for regulated real-

world assets and the machine economy.

With deterministic transaction finality, a multi-VM execution layer supporting both WebAssembly and soon EVM smart contracts, and fixed-cost operations enforced at the protocol level, Casper delivers the infrastructure for compliant asset tokenization, frictionless consumer experiences, and autonomous machine-to-machine commerce.

The Casper Manifest - the network's multi-year technical roadmap - advances nine coordinated protocol initiatives spanning developer access, user experience, institutional compliance, privacy, micropayments, and quantum safety.

The Casper Association, a non-profit organization based in Zug, Switzerland, oversees protocol development and ecosystem growth.
