ZenaTech Reports Annualized Revenue Run Rate of Approximately CAD $33 Million Based on First Quarter 2026 Revenue

VANCOUVER, BRITISH COLUMBIA, CANADA, July 2, 2026 /EINPresswire.com/ -- ZenaTech, Inc. (Nasdaq: ZENA) (FSE: 49Q) (BMV: ZENA) ("ZenaTech"), a technology company specializing in AI (Artificial Intelligence) drone, Drone as a Service (DaaS), enterprise SaaS, and Quantum Computing solutions, today reports that its 2026 annualized revenue run rate is approximately CAD $33 million. This is based on a simple annualized calculation of first quarter 2026 results (the three months ended March 31, 2026) of CAD $8.3 million multiplied by four.

Derived from first quarter results of CAD $8.3M multiplied by four, it reflects completed DaaS acquisitions contribution and continued drone workflow integration across the company's portfolio

ZenaTech is a B2i Digital Featured Company. See their comprehensive profile at: https://b2idigital.com/zenatech-1

"Our first quarter revenue reflects the strength of our DaaS model and the contribution of the acquisitions we have been in the process of integrating over the past year," said Shaun Passley, Ph.D., ZenaTech CEO. "Annualizing the quarter puts us at roughly CAD $33 million, and we view that as a baseline rather than a ceiling. We have completed several acquisitions during the period, which will contribute a full twelve months of revenue for the first time later in the year. Our DaaS acquisition pipeline remains active, and our recently disclosed Partnership Acquisition Program is progressing with the kind of founder-led, profitable companies we want on the platform."

The annualized revenue run rate is derived by multiplying first-quarter 2026 revenue by four, and is for illustrative purposes only. It is intended to demonstrate the current revenue scale of the Company's operations following the completion of its DaaS acquisitions. It should not be interpreted as management's financial guidance or forecast for fiscal 2026.

ZenaTech expects additional revenue growth as recently acquired businesses contribute a full year of revenue and its DaaS and Partnership Acquisition programs continue to expand.

ZenaTech's primary revenue engine remains the DaaS segment, through which the Company acquires operationally mature but under-digitized service businesses and integrates its ZenaDrone proprietary drone platforms and AI analytics into their workflows. The Company continues to target land survey and geospatial mapping, infrastructure and asset inspection, and exterior building cleaning businesses — sectors where drone-enabled service delivery can provide an immediate productivity advantage. As drone utilization deepens within each portfolio company, ZenaTech anticipates revenue expansion through capacity growth, contract upsell, new drone-derived data product lines, and improved operating margins.

Several acquisitions completed during fiscal 2025 and the first half of fiscal 2026 contributed only partial-year revenue in the periods they closed. These businesses are expected to contribute a full twelve-month revenue run rate for the first time during the balance of fiscal 2026.

In May 2026, ZenaTech announced a Partnership Acquisition Program, through which the Company is pursuing acquisitions of established, founder-led, profitable businesses in four core verticals: defense technology and unmanned systems, enterprise SaaS and productivity software, AI infrastructure and applied AI, and specialty manufacturing and supply chain. The Company has entered into non-binding letters of intent and term sheets as discussions progress toward potential definitive agreements.

About ZenaTech

ZenaTech, Inc. (Nasdaq: ZENA) (FSE: 49Q) (BMV: ZENA) is a technology company that specializes in AI autonomy drone platforms to transform industrial, government, and defense sectors. Its subsidiaries include drone manufacturing through ZenaDrone, a global Drone as a Service (DaaS) business, and a separate enterprise SaaS division of multiple software brands. The Company is executing an acquisition-led DaaS roll-up strategy to digitize and automate legacy service industries like land surveys and inspections, driving drone-based scalable, recurring revenue growth. With an operating footprint spanning North America, Europe, the Middle East, and Asia, ZenaTech is advancing AI drones for agriculture and logistics, as well as ISR, cargo, and counter-UAS applications for U.S. defense and NATO allies. The company is investing in next-generation technologies, including drone swarms, quantum computing, and advanced AI autonomy to capture long-term opportunities in key markets through its R&D initiatives.

About ZenaDrone

ZenaDrone, a subsidiary of ZenaTech, develops and manufactures AI-powered multifunction autonomous drone solutions integrating machine learning, predictive analytics, and advanced computing technologies, for government, defense, and industrial applications. This includes multifunctional drones for surveying, inspections, logistics, security, and defense applications. Its product portfolio under development includes the ZenaDrone 1000 for ISR defense and specialized cargo, the IQ Nano for indoor inventory management and security, the IQ Square for outdoor inspections and maintenance, the IQ Quad for land surveying, and the IQ Aqua, for underwater applications. ZenaDrone operates three global manufacturing facilities in Arizona, Dubai, and Taiwan, and is advancing counter-UAS maritime interceptor drones and an integrated defense system.
