

Medi Hair Loss & Scalp Clinic Expands Evidence-Based Hair Loss Treatments to Barrie, Ontario

BARRIE, ONTARIO, CANADA, July 8, 2026 /EINPresswire.com/ -- Medi Hair Loss & Scalp Clinic, commonly known as Medi Hair Loss Clinic, has announced the expansion of its comprehensive hair loss treatment services in Barrie. The clinic's new Barrie location is scheduled to open in fall 2026, bringing its evidence-based, non-surgical hair restoration solutions to men and women throughout Barrie and Simcoe County.

Recognized as one of Ontario's leading hair loss clinics, Medi Hair Loss Clinic specializes in diagnosing and treating the underlying causes of hair loss using advanced scalp analysis, personalized treatment plans, and scientifically supported therapies.

According to the Canadian Dermatology Association, hair loss can affect both men and women, and it may result from genetics, aging, hormonal changes, autoimmune diseases, nutritional deficiencies, medications, or physical and emotional stress. The Association notes that male pattern hair loss affects approximately 50% of men, while about 40% of women experience signs of female pattern hair loss by age 50. As awareness of hair and scalp disorders continues to grow across Canada, so does the demand for accurate diagnosis and evidence-based hair loss treatment. Medi Hair Loss & Scalp Clinic remains committed to providing personalized, science-backed hair restoration and scalp care by identifying the underlying cause of hair loss before recommending treatment.

"Our mission is to provide Barrie residents and surrounding towns such as Innisfil, Springwater, Essa Township, Bradford, and others with access to personalized, clinically guided hair

restoration solutions that combine medical science with holistic care," said Grace O. Abejide, CEO of Medi Hair Loss & Scalp Clinic. "Every client deserves an accurate diagnosis and a customized treatment plan designed to achieve healthier hair, improved scalp health, and long-term results."

As a dedicated [Hair Loss Clinic in Barrie](#), the clinic will offer comprehensive evaluations for a wide range of conditions, including male and female pattern hair loss, alopecia areata, telogen effluvium, traction alopecia, scarring alopecias, and scalp disorders.

Each client undergoes a comprehensive hair and scalp assessment, including digital scalp analysis, medical history review, and lifestyle evaluation before treatment recommendations are made.

"Hair loss is a symptom, not a diagnosis," Grace added. "Our specialists focus on identifying the underlying cause—whether genetic, hormonal, nutritional, autoimmune, inflammatory, or lifestyle-related—before recommending the most appropriate treatment. Our goal is to restore healthier hair growth, improve hair density and scalp health, and help patients maintain their results through ongoing monitoring and home-care protocols."

Medi Hair Loss & Scalp Clinic remains committed to investing in continuing education, clinical excellence, and patient-centered care to provide safe, effective, and personalized hair loss solutions in Barrie.
