

Dane Functional Health offers SoftWave Therapy to support musculoskeletal recovery and whole-body wellness

Dane Functional Health expands SoftWave Therapy in Oakland, offering non-invasive regenerative treatment for musculoskeletal pain and functional wellness.

OAKLAND, CA, UNITED STATES, July 14, 2026 /EINPresswire.com/ -- [Dane Functional Health](#), a functional medicine practice serving Oakland, California, is offering access to SoftWave Tissue Regeneration Therapy, a non-invasive treatment designed to support the body's natural healing response. The therapy is now available for patients experiencing musculoskeletal pain and injuries while also serving as part of the clinic's comprehensive, individualized approach to functional health and wellness.

[SoftWave Therapy](#) utilizes broad-focused electrohydraulic shockwave technology to stimulate biological healing processes within damaged or inflamed tissue. By promoting blood flow, activating resident stem cells, and encouraging tissue regeneration, the treatment is intended to support recovery from conditions involving muscles, tendons, ligaments, and joints. Because the procedure is non-invasive and requires little to no downtime, it offers an alternative for individuals seeking conservative care before considering more invasive interventions.

The practice emphasizes identifying and addressing the underlying causes of health concerns rather than simply managing symptoms. SoftWave Therapy complements this philosophy by integrating regenerative technology into personalized treatment plans tailored to each patient's clinical presentation and long-term health goals.

In addition to its applications for musculoskeletal conditions, the clinic incorporates SoftWave

Therapy into select functional medicine protocols for patients with complex health concerns, including digestive and gastrointestinal dysfunction, when clinically appropriate. Treatment recommendations are based on a comprehensive evaluation, with therapy serving as one component of a broader care strategy that may include nutritional guidance, lifestyle interventions, and functional medicine services.

As part of its comprehensive, Dane Functional Health continues to invest in evidence-informed therapies that support recovery and improved function. Individuals interested easily [schedule a consultation](#).

About Dane Functional Health:

Dane Functional Health is a functional medicine practice located in Oakland, California, dedicated to helping patients achieve better health by identifying and treating the root causes of chronic conditions. The clinic combines advanced diagnostics, personalized treatment plans, regenerative technologies, and lifestyle-based care to support long-term wellness. Its services include functional medicine, regenerative therapies, nutritional support, and innovative non-invasive treatments designed to improve health, mobility, and quality of life.
