

ProWebChat Introduces AI YOU™ and AI YOU OS™ Expanding static AI Responses into a Personalized Digital Identity Platform

New platform combines conversational AI, persistent identity, knowledge management to create AI-powered digital representations of individuals and organizations

CHEYENNE, WY, UNITED STATES, July 13, 2026 /EINPresswire.com/ -- —

ProWebChat today announced the commercial launch of [AI YOU™](#) and [AI YOU OS™](#), a platform designed to enable individuals, entrepreneurs, executives, creators, consultants, coaches, professionals, and organizations to create AI-powered

digital representations capable of communicating information, answering questions, and interacting across websites and digital channels. According to the company, the platform introduces an approach it describes as AI Digital Identity, combining conversational AI with

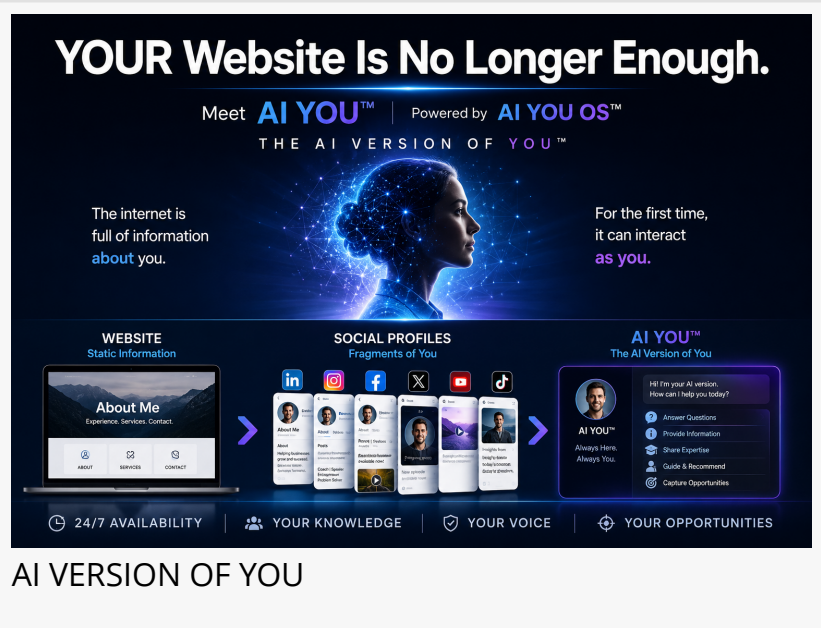

persistent identity, structured knowledge, conversational memory, and profile-based interactions.

“

I invite you to meet my AI YOU™. Ask me questions. Challenge me. Learn from me. Experience what it's like to have a real conversation with the AI version of David ProWebChat.com/@ExperiencedCEO”

works in practice.”

Platform Overview:

AI YOU™ enables account owners to create personalized AI representations using information they choose to provide. Each AI profile remains available through multiple digital touchpoints.

- AI YOU™ Profile Page
- Shareable AI profile link
- AI YOU™ Website Widget
- Persistent conversational interactions
- Lead capture and appointment support

AI YOU OS™:

AI YOU OS™ is the operating platform supporting every AI YOU™ profile. It combines identity management, structured knowledge, conversational memory, and intelligent retrieval to maintain consistency while expanding available knowledge.

- AI Brain™
- Identity Engine™
- Knowledge Engine™
- Conversation Memory™
- Intelligent Knowledge Retrieval™

Beyond Traditional Websites:

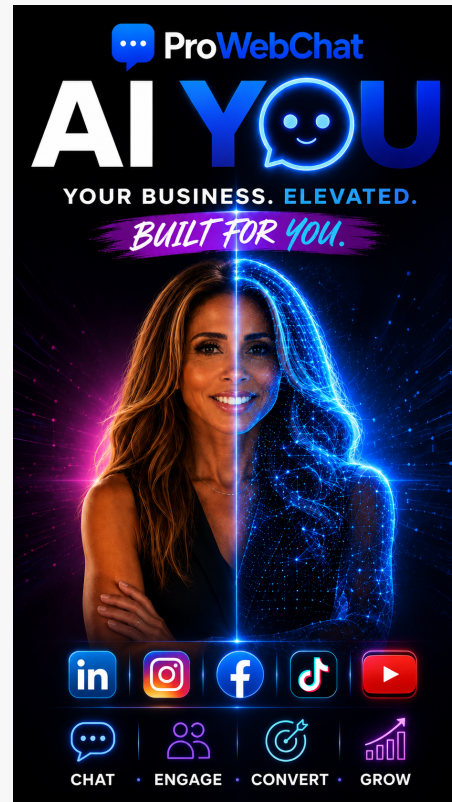

According to ProWebChat, AI YOU™ is intended to complement—not replace—traditional websites by providing conversational access to information that would otherwise remain static. The company believes AI-powered digital identities can become an additional layer of online presence alongside websites and social platforms.

Why This Announcement Matters:

The launch reflects a broader shift in artificial intelligence from task-based assistants toward persistent AI identities capable of representing individuals and organizations across multiple digital environments.
