

Greenlight Networks Completes Acquisition of FastBridge Fiber, Expanding Reach Across Pennsylvania and New York

WYSOMISSING, PA, UNITED STATES, July 9, 2026 /EINPresswire.com/ --

[Greenlight Networks](#) ("Greenlight"), a leading fiber-to-the-home provider, is pleased to share the completion of its acquisition of [FastBridge Fiber](#), a Reading, Pennsylvania-based fiber internet provider. The transaction, [initially announced](#) on November 3,

2025, builds upon Greenlight's broader northeast growth strategy, particularly in communities located throughout Northeast and South-Central Pennsylvania, and Western New York.

FastBridge Fiber serves customers in Buffalo, New York, and several Pennsylvania communities, including Berks County, Bloomsburg, Danville, Williamsport, Erie and Hazleton. The transaction adds more than 65,000 household passings to Greenlight's existing footprint in those areas, with tens of thousands more expected by year-end with construction efforts already underway.

"We are pleased to see the continued growth and investment in the fiber network for our businesses and residents being brought through the acquisition of FastBridge Fiber by Greenlight Networks. This will further enhance the connectivity in our community providing additional resources that Greenlight Networks will be bringing to our market," said Jason Fink, President/CEO, Williamsport/Lycoming Chamber of Commerce.

"With our recently announced joint venture with T-Mobile and last year's acquisition of Loop Internet, this marks yet another major step in Greenlight's evolution as a leading fiber provider in the Northeast," said Greenlight's CEO, Mark Murphy. "Through the addition of the FastBridge team's deep, local roots to our existing efforts in Pennsylvania, we are accelerating expansion into new markets across the state, while further strengthening our footprint in Buffalo, New York."

This deal significantly expands the company's workforce with 120 FastBridge team members joining Greenlight's 250 employees, bringing the total to approximately 370 employees. Additionally, the combination will strengthen Greenlight's operational hub in Buffalo, New York

while adding new operational hubs through FastBridge's existing Wyomissing, Williamsport, and Robesonia office locations.

Already serving more than 320,000 households and businesses across New York, Pennsylvania and Maryland, Greenlight continues to expand its network to meet the growing demands for high-speed connectivity across the Northeast. In April, the company announced a \$62 Million expansion into Pennsylvania's Lehigh Valley. Greenlight's fiber network delivers symmetrical upload and download speeds of up to 8 Gbps providing fast, reliable connectivity without data caps, contracts or hidden fees.
