

Atrium AI Launches the World's First Agentic Workforce Built for the Church

Atrium Verge™ introduces a new workforce of intelligent employees that complete the administrative work of ministry, giving pastors more time to serve people.

DALLAS, TX, UNITED STATES, July 14, 2026 /EINPresswire.com/ -- [Atrium AI](#) today announced the launch of [Atrium Verge](#), the world's first workforce of [Agentic Employees](#) built specifically for churches. Debuting this week at the Church Leaders Conference in Florida, Atrium Verge introduces a new category of ministry technology that gives every church intelligent employees that work alongside pastors and ministry teams.

Unlike traditional AI assistants that answer questions or generate content, Agentic Employees complete real work. They manage calendars, respond to emails and text messages, prepare meeting notes, coordinate volunteers, conduct research, follow up with guests, create social media content, monitor Google Ad Grants, generate reports, and automate hundreds of repetitive administrative tasks.

Less administration. More ministry.

Atrium Verge works seamlessly to integrate with the technology churches already use, including Google Workspace, Microsoft 365, Gmail, Outlook, leading Church Management Systems (CHMS), QuickBooks, Facebook, Instagram, YouTube, X, calendar platforms, and many other applications. By working across these systems, they complete entire workflows—not just individual tasks—without requiring churches to replace the software they already trust.

"Churches have had software for decades," said TJ Person, Co-Founder and CEO of Atrium AI. "What they've never had are employees that never sleep. Atrium Verge gives every church a team of Agentic Employees working around the clock so pastors and staff can spend less time managing tasks and more time discipling people, caring for families, developing leaders, and advancing the mission of the Church."

The graphic features the Atrium Verge logo at the top left, with the tagline "AGENTIC EMPLOYEES FOR CHURCHES" and "YOUR CHURCH'S VIRTUAL ASSISTANT". The central text reads "More Ministry. Less Administration." Below this is a list of tasks: "Ask questions.", "Draft emails.", "Follow up with guests.", "Coordinate volunteers.", and "Get ministry insights." To the right is a smartphone displaying a chat interface with the question "How can I help you today?" and several suggested tasks like "Who visited for the first time on Sunday?", "Draft a thank-you email to our volunteers.", "What does my schedule look like this week?", and "Show me key trends from this month." At the bottom, four icons represent key benefits: "SAVE TIME" (Automate the busy work so you can focus on what matters most.), "EMPOWER YOUR TEAM" (Give your team the tools and time to do their best work.), "MAKE SMARTER DECISIONS" (Get the insights you need to lead with clarity and confidence.), and "FOCUS ON PEOPLE" (Less administration. More ministry.). Below these is a section titled "WORKS WITH THE TOOLS YOUR CHURCH ALREADY USES" showing logos for Planning Center, Subsplash, Gmail, Outlook, Google Calendar, and others. At the bottom, it states "Built around the belief that Thriving Teams Build Healthy Churches." and "Learn more at heartbeat.ai/verge".

TJ Person, Co-Founder & CEO, Atrium AI

Every task an Agentic Employee completes creates more time for ministry. Technology should amplify ministry—not replace it.”

Atrium AI*

Each Agentic Employee is purpose-built for a specific ministry role, including executive assistance, communications, guest follow-up, volunteer coordination, finance support, research, marketing, event planning, and operations. Powered by advanced AI, they collaborate with church staff while completing meaningful work autonomously.

“For many pastors, administration has quietly become one of the greatest barriers to ministry,” said Byron Bledsoe, Senior Pastor of C3 Church. “Delegating hours of administrative work to trusted Agentic Employees has the potential to transform how churches operate, giving pastors more time for discipleship, leadership, and caring for people.”

Built around the belief that Healthy People Build Healthy Churches, Atrium Verge exists to remove administrative burdens so ministry leaders can invest more time building relationships and serving their communities.

Conference attendees will experience live demonstrations of Agentic Employees completing ministry workflows in seconds that traditionally require hours of manual work.

“Our vision has never been to replace pastors or church staff,” TJ added. “Our vision is to remove the work that keeps ministry leaders from people. Every administrative task an Agentic Employee completes creates another opportunity to pray with someone, mentor a volunteer, visit a family in crisis, or share the Gospel. Technology should amplify ministry—not become the ministry.”

About Atrium AI

Atrium AI builds intelligent technology that helps churches strengthen ministry, deepen engagement, and eliminate administrative burdens. Its products include Atrium Verge, the world’s first workforce of Agentic Employees built for the Church; Atrium Heartbeat, a congregational intelligence platform; and Atrium Pathways, an AI-powered guest engagement solution.
