

Five Reputable Pharmaceutical Packaging Machine Manufacturers in China 2026: Advancing Efficient Packaging Solutions

Highlighting Reliable Manufacturers with Expertise in Automated Pharmaceutical Packaging Equipment and Production Solutions

CALIFORNIA, CA, UNITED STATES, July 10, 2026 /EINPresswire.com/ -- HANGZHOU, China, July 10, 2026 — The global pharmaceutical packaging equipment market was valued at approximately USD 10.71 billion in 2024, according to SkyQuest Technology. With Asia Pacific holding the largest revenue share of 40.7% in 2025 per Grand View Research, Chinese manufacturers have become key players in supplying efficient, compliant packaging machinery. This article profiles five reputable Chinese pharmaceutical packaging machine manufacturers in 2026, with a focus on Zhejiang [Hoping Machinery Co., Ltd.](#), alongside Truking Technology Limited, Pharmapack (Guangzhou) Packaging Equipment Co., Ltd., Liaoning Chunguang Pharmaceutical Equipment Co., Ltd., and UPMACH CO., LTD.

Industry Context: Growing Demand for Integrated Packaging Lines

The pharmaceutical [blister packaging machine](#) market is projected to reach USD 2.57 billion by 2025 with a CAGR of 2.8% (Custom Market Insights). Meanwhile, the global cartoning machinery market for pharmaceuticals was valued at USD 1.46 billion in 2024 (Fortune Business Insights). These figures underscore the increasing need for reliable, high-speed pharmaceutical packaging

machines—particularly turnkey solutions that integrate blister packaging, cartoning, case packing, and end-of-line handling. Chinese manufacturers have been expanding their presence across Southeast Asia, the Middle East, Eastern Europe, South America, and Africa, offering competitive alternatives to established European players.

Zhejiang Hoping Machinery Co., Ltd. (HOPING)– Comprehensive End-of-Line Solutions

Established in 2001, Zhejiang Hoping Machinery Co., Ltd. (HOPING) is a professional pharmaceutical packaging machinery manufacturer that integrates R&D, production, marketing, and service. The company employs approximately 300 staff and operates a manufacturing facility covering 28,800 square meters. Its main products include blister packaging machines, cartoning machines, case packing machines, and end-of-line packaging machines, serving pharmaceutical, food, electronics, and cosmetics industries.

HOPING's R&D team comprises 56 engineers. The company has obtained 26 invention patents, 70 utility patents, 4 appearance patents, 10 PCT-protected patents (in Europe, Russia, Germany, Italy and other countries), and 28 software copyrights. With 20+ years of experience, HOPING exports about 25% of its annual output—approximately 500 machines per year—to markets including Southeast Asia, the Middle East, Eastern Europe, South America, and Africa.

Key product models include the DPH320HII rotary blister packing machine (max. 250 punches/min, up to 1,000 blisters/min), the XWZ500H full-servo high-speed cartoning machine (100–500 cartons/min), and the ICP12 intelligent case packing and palletizing integral machine. The company also offers fully integrated blister-cartoning lines such as the DHL8005H (800 blisters/min + 500 cartons/min) and turnkey solutions like the IXW600 blister-flow-wrap-cartoning line. HOPING's equipment meets GMP requirements and is built with AISI 316L/304 stainless steel and anodized aluminum alloy.

Four Other Notable Chinese Manufacturers

The following companies are widely recognized in the pharmaceutical packaging machinery sector and offer complementary capabilities:

Truiking Technology Limited – A major Chinese manufacturer listed on the Shenzhen stock exchange, Truiking is known for its extensive portfolio covering filling, sealing, and packaging equipment for liquid and solid dosage forms, as well as complete aseptic processing lines.

Pharmapack (Guangzhou) Packaging Equipment Co., Ltd. – Specializes in blister packaging machines and cartoning equipment for the pharmaceutical industry, with a strong focus on the Chinese domestic market and growing export presence.

Liaoning Chunguang Pharmaceutical Equipment Co., Ltd. – Established in the 1970s, this company has a long history in manufacturing blister packaging machines and pharmaceutical drying equipment, serving customers primarily in Northeast Asia and Central Asia.

UPMACH CO., LTD. – Based in Zhejiang, UPMACH produces automatic blister packing machines and cartoning lines for tablets and capsules, targeting mid-to-high-end markets in China and abroad.

Market Impact and Analyst Perspective

According to Market Intelligence Report, the top three global players (Uhlmann, IMA, Marchesini) collectively hold about 29% of the pharmaceutical blister packaging machine market. However, Chinese manufacturers are rapidly gaining share by offering cost-effective, GMP-compliant solutions with increasingly higher speeds and integration levels. HOPING's investment in R&D (56 engineers) and intellectual property (over 100 patents) positions it as a competitive alternative, especially for buyers seeking integrated blister-cartoning-case packing lines from a single supplier.

Industry analysts note that the shift toward turnkey pharmaceutical packaging lines—where blister, cartoner, bundler, and case packer are supplied and serviced by one vendor—reduces integration risks and improves line efficiency. HOPING's product range, from the DPP series flat blister machines to the DHL8005H high-speed line, addresses this demand directly.

Closing Outlook

As pharmaceutical companies continue to modernize their packaging operations to meet stricter regulatory standards and higher output requirements, Chinese manufacturers like HOPING are well-positioned to provide efficient, compliant, and cost-competitive packaging machines. With a strong engineering foundation, proven export track record, and a comprehensive product portfolio, HOPING offers a reliable partner for pharmaceutical packaging projects worldwide.
