

Retina.com is Now Available for Acquisition Exclusively Through Domain Holdings Group

Domain Holdings Group, a top premium domain brokerage firm announces the exclusive representation of Retina.com for immediate availability.

BOCA RATON, FL, UNITED STATES, July 28, 2026 /EINPresswire.com/ -- Domain Holdings Group, a leading premium domain brokerage firm, is excited to announce it has been exclusively retained to represent the owners of Retina.com.

Available for acquisition for the first time in its history, Retina.com offers a rare opportunity for an artificial intelligence, technology, or healthcare company to own one of the most compelling brand names on the internet. Short, precise, and instantly recognized, Retina is a name that can define a company rather than simply describing it. Retina.com suggests a depth of perception and the ability to see what others miss, concepts at the core of

what AI promises to deliver. The name also carries a natural advantage in healthcare AI, one of technology's fastest-growing sectors. Retinal imaging and AI-driven diagnostics represent a multibillion-dollar market, meaning an acquirer inherits instant authority in a field where the name is already the industry term.

“

Retina.com is the kind of name that comes along once in a generation. It works as a consumer brand, an enterprise platform, a research institution, or any AI company.”

Mark Daniel

“Retina.com is the kind of name that comes along once in a generation,” said Mark Daniel, Managing Director of Domain Holdings Group. “It works as a consumer brand, an enterprise platform, a research institution, or a

healthcare AI company. The right domain doesn’t just support a brand, it elevates it.”

Retina.com has remained under continuous ownership by the same physician group since its original registration and has never before been publicly offered for sale. That combination of

history, simplicity, and broad strategic appeal makes it one of the most significant premium domain acquisition opportunities to reach the market this year.
