What Is The Expected CAGR For The Companion Animal Arthritis Market Leading Up To 2030?

The expected CAGR for the companion animal arthritis market leading up to 2030 is 10%.

What Will Be The Growth Driving Factors In The Global Companion Animal Arthritis Market In The Forecast Period?
The rapid growth of the global companion animal arthritis market leading up to 2030 will be driven by the following key factors that are expected to increase awareness of companion animal musculoskeletal health, accelerate innovation in veterinary arthritis therapeutics, and strengthen expenditure on advanced pet healthcare and wellness solutions worldwide..

Growing Awareness Of Animal Health - The growing awareness of animal health is expected to become a key growth driver for the companion animal arthritis market by 2030. Pet owners are becoming increasingly proactive in recognizing mobility issues, joint discomfort, and age-related health conditions in companion animals. Educational initiatives from veterinary organizations and animal health companies are encouraging routine health assessments and earlier intervention for musculoskeletal disorders. This heightened awareness is supporting greater demand for arthritis diagnostics, monitoring services, and therapeutic solutions. The expanding focus on preventive and wellness-oriented pet care is further strengthening market development. As a result, the growing awareness of animal health is anticipated to contribute approximately 2.8% annual growth to the market.

Advancements In Veterinary Pharmaceuticals - Advancements in veterinary pharmaceuticals are expected to emerge as a major factor driving the expansion of the companion animal arthritis market by 2030. Continuous innovation in animal health therapeutics is improving the effectiveness, safety, and convenience of arthritis management options. New formulations, extended-duration treatments, and targeted pain-relief solutions are helping veterinarians provide more personalized care for affected animals. Pharmaceutical companies are also increasing research efforts focused on chronic musculoskeletal conditions in pets. Consequently, advancements in veterinary pharmaceuticals are projected to contribute around 2.5% annual growth to the market.

Increasing Expenditure On Pet Healthcare - The increasing expenditure on pet healthcare is expected to act as a key growth catalyst for the companion animal arthritis market by 2030. Pet owners are allocating larger portions of household spending toward veterinary consultations, specialty treatments, rehabilitation services, and supportive care products. The growing humanization of pets is encouraging investment in comprehensive healthcare solutions that improve comfort, mobility, and overall well-being. Rising disposable incomes and broader access to premium veterinary services are also supporting sustained treatment adoption. Therefore, the increasing expenditure on pet healthcare is projected to contribute approximately 2.2% annual growth to the market.
