

SGS Laboratory Becomes First TISAX-Approved Service Provider in India

SGS's Pune Chakan automotive laboratory now provides testing under the TISAX® information security standard.

BAAR, SWITZERLAND, July 13, 2026 /EINPresswire.com/ -- SGS, the world's leading testing, inspection and certification company, is pleased to announce that its Pune Chakan laboratory has been approved to provide testing services under Trusted Information Security Assessment Exchange (TISAX®). This voluntary standard provides a uniform level of information security for car manufacturers and their supply chains, and the Pune facility is the first in India to be approved as a TISAX assessment service provider.

Connected vehicle technology is generating unprecedented volumes of sensitive data – SGS's Pune Chakan laboratory is now India's first TISAX®-approved service provider.

The German automotive industry created the TISAX® standard to offer a consistent benchmark for automotive supply chains, enabling them to demonstrate that specific security benchmarks have been met. The increase in automotive smart technology has led to greater risks to associated data, and TISAX assessment assures the safety and integrity of personal and commercially sensitive data.

Compliance with TISAX requirements offers a range of benefits beyond industry recognition, including:

- Reduced risk and stronger data governance
- Enhanced credibility through a single, standardized assessment
- Ability to share results with multiple OEMs via the ENX portal, eliminating duplicate audits, reducing effort and lowering long-term compliance costs
- Recognition as a preferred supplier in security-critical markets
- Alignment with OEM prototype protection requirements and global standards, including ISO

27001 and the UK General Data Protection Regulation

- Access to international markets through improved global compatibility and scalability

The Pune laboratory joins a network of TISAX-assessed sites in China and Germany, further strengthening SGS's global TISAX network and expanding service availability for clients in South Asia.

This recognition of the Pune laboratory's expertise and experience demonstrates SGS's commitment to ensuring the protection of sensitive customer and prototype data with the highest standards of confidentiality and trust, while expanding global access to reliable automotive testing services.
