

# Emerge Wall Light by Seyedsajad Jalalsadat Wins Iron in A' Lighting Industry Awards

*A Concealed Source Wall Luminaire  
Recognized for Transforming Hidden  
Light into a Controlled Spatial Event*

COMO, CO, ITALY, July 14, 2026

/EINPresswire.com/ -- The A' Design Award has announced Emerge, a wall light designed by [Seyedsajad Jalalsadat](#), as a recipient of the Iron A' Design Award in the [Lighting](#) Products and Fixtures Design category. The A' Design Award is one of the world's highly respected and well-recognized design accolades, evaluating entries through a blind peer-review process conducted by an expert jury panel. This recognition positions Emerge among works that meet rigorous professional and industrial standards within the lighting design field. The distinction acknowledges both the conceptual depth and the technical execution embodied in the luminaire. For Seyedsajad Jalalsadat, the honor marks a meaningful milestone within an ongoing design practice.

The recognition of Emerge holds relevance for the lighting industry as it addresses a growing interest in concealed light sources, glare reduction, and seamless architectural integration. The design responds to contemporary demand for fixtures that prioritize luminous clarity while contributing to spatial atmosphere rather than dominating it. Its high reflectance interior advances energy efficiency, aligning with sustainability practices increasingly expected across the sector. The tooling free manufacturing approach offers practical value for producers seeking reduced material waste and accessible production. For specifiers and end users, Emerge delivers a refined balance of function, durability, and considered aesthetics.

Emerge is a wall luminaire shaped as a closed geometric volume that conceals and modulates

illumination, allowing light to manifest as a controlled presence rather than a visible element. The inner surface is precisely calibrated to reinforce reflection and maintain luminous clarity, transforming light into a spatial event. A central vertical opening marks the decisive point of emergence, while surrounding apertures convey a gradual release. The dialogue between the solid exterior and the emerging glow establishes a distinct architectural identity that articulates the transition from enclosure to revelation. This deliberate containment distinguishes the fixture through its quiet composure and seamless integration within the built environment.

The Iron A' Design Award recognition may inform future directions for Seyedsajad Jalalsadat and the studio behind the work, encouraging continued exploration of concealed illumination and material efficient production. The achievement reinforces a design philosophy that unites symbolic expression with functional performance. It serves as motivation for further research into aperture geometry and indirect illumination behavior. The honor supports ongoing commitment to thoughtful, manufacturable lighting solutions.

Interested parties may learn more about the award-winning design, view its details, and explore the work of its designer at the dedicated page provided by the A' Design Award.

#### About Seyedsajad Jalalsadat

Seyedsajad Jalalsadat is an industrial designer from Iran whose design journey began in childhood with a passion for car design inspired by playing Grand Turismo. His aspiration to design for BMW shaped his path, leading him to study Industrial Design at Tehran Markaz University, and from the age of 15 he worked in industrial environments, gaining valuable experience in market needs and industry dynamics. Creating innovative designs since 2016, he joined Hobo in 2023, where his dedication resulted in multiple international [design awards](#), including the A' Design Award. These accomplishments mark an early stage in a continuing design career.

#### About Bayerstark

Bayerstark is an independent design studio founded by Seyedsajad Jalalsadat in Tehran, Iran. The studio specializes in production oriented product and lighting design, focusing on modular systems, material efficiency, and sustainable solutions. Its projects are developed with real manufacturing constraints in mind, while select works explore conceptual ideas to expand formal and functional possibilities. Bayerstark combines minimal aesthetics with technical precision and practical implementation.

#### About the Iron A' Design Award Recognition

The Iron A' Design Award is granted to good designs that meet the professional and industrial standards established by the A' Design Award. Within the Lighting Products and Fixtures Design category, entries are assessed against criteria including innovation in lighting design, functionality and efficiency, aesthetic appeal, integration with environment, sustainability and energy efficiency, material selection, light quality and consistency, durability and longevity, safety

considerations, optimal illumination, thermal management, and visual comfort. Recipients are acknowledged for practical innovations and a solid understanding of design principles demonstrated through thoughtful execution. The designation reflects technical competence linked with know-how and creative capacity. Designs honored with this title are regarded as practical, innovative contributions that support quality of life improvements.

#### About A' Design Award

The A' Lighting Products and Projects Design Award is an international and juried competition that welcomes lighting designers, design agencies, companies, manufacturers, and brands within the lighting and interior design industries. Entries are evaluated through a blind peer-review process based on pre-established criteria, assessed by a world class jury panel of design professionals, industry experts, journalists, and academics. Organized across all industries since 2008 and now in its 18th year, the A' Design Award is open to entries from all countries, with the ultimate aim of recognizing and promoting superior products and projects that advance and benefit society to help create a better world. Driven by a philanthropic mission, the competition celebrates remarkable achievements on an international stage and promotes a global appreciation for the principles of good design.
