

Polar Tint Henderson Expands Commercial & Fleet Window-Film Services

New solar-control, security, and anti-graffiti films plus fleet branding give Henderson businesses one bilingual source for window film.

HENDERSON, NV, UNITED STATES, July 15, 2026 /EINPresswire.com/ -- Polar Tint Henderson has expanded its commercial and fleet window-film services, giving Henderson-area businesses a single local source for solar-control film on storefronts and offices, safety and security film, anti-graffiti film, and fleet branding and decals.

The expansion targets a growing need among local commercial property owners, facility managers, and fleet operators who want to cut glare and heat, protect glass and merchandise, and put their brand on the road. Polar Tint Henderson's commercial team handles everything from single-pane storefront jobs to multi-building office glazing and full vehicle-fleet wraps and lettering. Details and a project request form are available at henderson.polarint.com/window-film/commercial/.

A branded Polar Tint Henderson fleet vehicle featuring the company's window film and decal work.

The Polar Tint logo.

Commercial solar-control film helps offices and retail spaces reject heat using the same professional-grade technology behind Polar Tint's Ceramic Ultimate Plus line, which delivers up to 98% infrared heat rejection. Security and safety film helps hold shattered glass together to

deter smash-and-grab break-ins and guard against storm and accident damage, while anti-graffiti film provides a sacrificial, replaceable layer that protects expensive storefront glass from etching and tagging. On the fleet side, the team produces branded decals, lettering, and partial and full wraps that turn service vehicles into moving advertising.

Automotive and residential window tinting remain core to the business. Polar Tint Henderson continues to serve drivers and homeowners across the east Las Vegas Valley, and all automotive work is installed to Nevada law, which requires a minimum of 35% visible light transmission on front side windows while allowing any darkness on rear side and back windows.

A key differentiator for local businesses is fully bilingual service. Every consultation, quote, and installation walkthrough is available in English and Spanish, so owners and managers across the diverse Henderson business community can plan a project in the language they prefer. Commercial and fleet customers can schedule a free on-site estimate, and automotive and residential customers can book a free in-shop estimate, by calling (702) 665-6009 or visiting henderson.polar tint.com.
