

Skin & Tonic Raleigh Debuts Bio Visage, Raising the Bar on Microcurrent Facial Treatments

Skin & Tonic in Raleigh proudly announces the launch of Bio Visage, an advanced, non-invasive French facial treatment developed by Laboratoires Mansard Paris.

RALEIGH, NC, UNITED STATES, July 15, 2026 /EINPresswire.com/ -- Skin & Tonic Raleigh proudly announces the launch of [Bio Visage](#), an advanced, non-invasive French facial treatment popularized in Italy and France, and developed by Laboratoires Mansard Paris. Bio Visage delivers firmer, brighter, more sculpted skin without the discomfort typically associated with microcurrent devices. Skin & Tonic Raleigh is one of the first skincare spas to offer this treatment in the United States.

“

If you do injectables, this is a way to maintain results and do it less often. If you don't do injectables but are looking for other ways to lift and tighten, you are going to LOVE Bio Visage.”

Lori Kreipl, co-founder and esthetician

Most microcurrent treatments work by targeting the muscles of the face to encourage tightening, often at the cost of client comfort. By comparison, Bio Visage unfolds in three distinct phases: Detoxification, Nutrition, and Toning,

combining electrotherapy assisted lymphatic drainage with concentrated skincare actives and a unique combination of currents that is barely felt throughout the treatment.

"The minute we tried Bio Visage, we knew this was the addition to our service menu we had been looking for. We had always been interested in offering a microcurrent service, but the reports of user discomfort with traditional microcurrent were not acceptable to us. We were delighted to find that Bio Visage had none of those side effects, and all of the results. We're so excited to offer this service to our clients."

~ Robin Deresh, Co-Founder and Esthetician at Skin & Tonic Raleigh

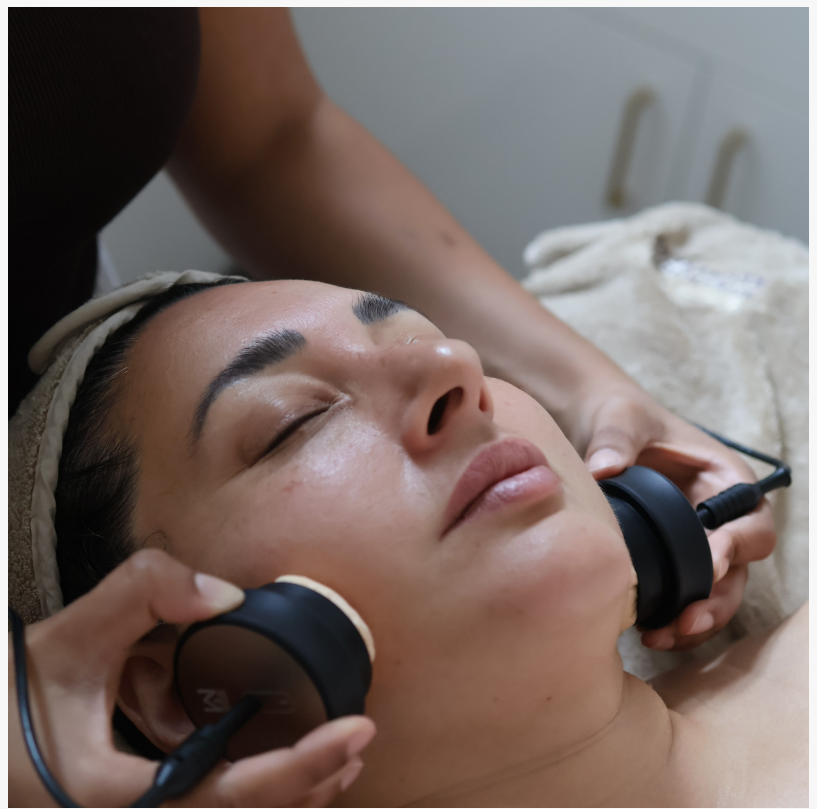

Like training the body, Bio Visage results are cumulative: the treatment delivers a visible glow after a single session, while a series of treatments, paired with an ongoing maintenance plan, produces the most significant and lasting transformation.

"If you do injectables, this is a way to maintain results and do it less often. If you don't do injectables but are looking for other ways to lift and tighten, you are going to LOVE Bio Visage."

~ Lori Kreipl, Co-Founder and Esthetician at Skin & Tonic Raleigh

Bio Visage is now available to book as a standalone treatment or as part of a [microcurrent treatment](#) package at Skin & Tonic Raleigh. Skin & Tonic's team of licensed estheticians will guide each client toward the right treatment cadence and maintenance plan for their individual skin goals.
