

Artemis ABA Launches HighLevel Integration to Eliminate Manual Intake Data Entry For ABA Practices

ABA providers can manage leads in HighLevel and automatically create client, insurance, and document records in Artemis ABA, eliminating duplicate data entry.

DALLAS, TX, UNITED STATES, July 17, 2026 /EINPresswire.com/ -- Artemis ABA, the #1-rated ABA practice management and billing built for applied behavior analysis (ABA) providers, today announced a native integration with HighLevel, the CRM and marketing platform many ABA practices use for lead intake. The integration creates client and provider records in Artemis the moment an intake is ready, removing the manual re-entry that sits between a practice's front office and its billing system.

The graphic features the Artemis ABA, INC. logo on the left and the HighLevel logo on the right. In the center, a woman and a young boy are shown interacting with a tablet. Overlaid on the image are two mobile app screens. The first screen, titled 'HighLevel New Lead', shows a 'Lead Captured' notification. The second screen, titled 'Artemis Client Created', shows a checklist with 'Client Record', 'Insurance Record', and 'Documents Created', all marked with green checkmarks. A blue 'Learn More' button is positioned below the text 'Onboard ABA Clients in Minutes Now'. At the bottom, a blue banner contains the text 'HighLevel intake data syncs directly into Artemis ABA.'

"Most ABA practices that grow on HighLevel hit the same wall. Their intake runs in one system, and their billing runs in another, and a coordinator spends half an hour per family moving data between them," said Thomas John, Founder and CEO of Artemis ABA. "This integration automates the data transfer, so coordinators can spend more time with clients and less time on manual data entry. It's a game-changer for ABA practices."

"HighLevel exists to help agencies and SMBs scale. That means making it easier for the specialized tools they rely on to plug directly into our platform. Artemis building this integration removes one of the biggest friction points ABA practices have told us about," said Robin Alex, Co-Founder of HighLevel.

Practices continue to manage new clients and provider inquiries in HighLevel with the forms and pipelines they already use. When a lead is ready for onboarding, Artemis automatically creates the record, including demographics, insurance details, and attached documents. From there, scheduling, [ABA Data Collection](#), and billing all run inside Artemis, behind the integration, so the practice can begin serving the family the same day.

□□ □□ □□□□ □□□□-□□□□□□□□ □□□□□□□□□□, □□□ □□□□□□□□ □□□□□□□□:

□□ Onboarding time per record cut from 25 to 40 minutes of manual entry to under two minutes.

□□ An estimated 15 to 20 administrative staff hours are reclaimed each month.

□□ Every required intake document is attached to the Artemis record automatically.

The HighLevel integration is available now to Artemis ABA customers. ABA practices that use HighLevel and want [ABA Practice Management Software](#) that connects directly to it can request a demonstration at artemisaba.com.
