

# Zoosoom Breaks Legacy Car History Monopoly With Its Next-Gen AI Vehicle Reports

*With the Launch of Next-Gen Vehicle Reports, Zoosoom Breaks the Car History Monopoly and Stops the \$40+ Consumer 'Rip-Off'*

CERRITOS, CA, UNITED STATES, July 17, 2026 /EINPresswire.com/ -- CYPRESS, CA – June 27, 2026

Zoosoom, the pioneering peer-to-peer automotive technology platform, today announced the launch of Zoosoom Car Reports, a direct, unprecedented reckoning for the legacy vehicle history monopoly. By offering the exact same volume of core historical and technical data as major traditional players — but adding real-time AI assessments and localized transactional intelligence — Zoosoom is completely transforming the impact of car reports and dismantling its bloated pricing structure.

For decades, a single vehicle history report could cost \$40+. Because all major players rely on the exact same underlying datasets, Zoosoom views this legacy pricing model as an outright consumer rip-off. Zoosoom's new initiative is rooted in its vision of democratizing automotive data and unlocking total transparency for everyday consumers.

**Dismantling the Paywall: The Most Aggressive Pricing in Automotive Tech**

To accelerate market adoption and empower consumers to gain confidence when transacting in the peer-to-peer marketplace, Zoosoom is introducing a highly disruptive pricing structure:

With Zooom Car Reports, we are delivering a superior level of value for our customers and an unmatched product for a fraction of the cost."

*Christophe*

Always Free for Your Own Vehicle: Any car registered in a user's [Zoocom Digital Garage](#) receives full history reports completely free, without conditions. Zoocom is built on the core promise that no one should ever have to pay to access the data they already rightfully own.

The Summer Launch Offer: From now until August 31, 2026, users can run up to three comprehensive vehicle reports completely free of charge (see website for full

conditions).

Zoocom Price Advantage: Starting September 1st, Zoocom will transition to a permanent, highly aggressive price positioning. While specific commercial tiers remain under wraps to protect Zoocom's market edge, the post-summer pricing will permanently slash traditional industry rates, undercutting even basic budget data aggregators while delivering significantly higher technical value.

Zoocom Marketplace Plus Benefit: In a continuous commitment for service excellence, any buyer who runs a paid Zoocom report on a vehicle not saved in a Zoocom Digital Garage will receive a 100% refund on that report if they complete their transaction on the Zoocom marketplace using [Stripe](#).

## Zoocom Car Reports Goes Beyond with Advanced Features and a Unique Set of Data

While legacy reports rely entirely on lagging administrative logs, police reports, or DMV registrations, the [Zoocom Car Report](#) introduces a suite of modern, highly actionable features guiding potential buyers to make the right decision:

The "AI Walkaround" Integration: Users conduct a 60-second guided visual video scan of the car. Zoocom's proprietary AI immediately analyzes the footage to capture real-time cosmetic wear (such as body scratches or interior cabin condition) and actively verifies instrument clusters to ensure no warning lights are illuminated, significantly enriching the depth of the historical report.

Actionable "What to Do Next" Framework: Instead of burying critical information in dense walls of text, Zoocom filters vehicle data into an immediate, prioritized checklist, explicitly flagging

overdue services or open safety recalls.

**NHTSA Owner Complaints Context:** Zooom cross-references the specific vehicle make and model year with broader consumer databases. By flagging recurring, owner-reported mechanical and electrical vulnerabilities, Zooom arms buyers with critical preventative knowledge before they buy that is simply not mentioned in any other reports.

**Localized Transaction & Tax Guidance:** Unlike standard reports, Zooom customizes the output based on the vehicle's exact jurisdictional location, explicitly calculating estimated state sales taxes and outlining regional title notarization or transfer laws.

**Integrated Pricing Guide:** Estimated Private Party, Trade-in, and Dealer values are embedded directly into the history timeline, eliminating the need to cross-reference third-party valuation sites.

#### A Message from Leadership

"Zooom continues to build unique capabilities that are fundamentally transforming the peer-to-peer car marketplace," said Sheng Wang, CEO and Co-Founder of Zooom. "With the launch of Zooom Car Reports, Zooom once again establishes itself as an indispensable player in the industry, leveraging data to create advanced, customer-centric AI features. By removing the friction of legacy systems and connecting buyers and sellers the way consumers expect, we are eliminating both the 'trust deficit' and the unnecessary middleman markups that have plagued this industry for too many years."

"Charging consumers exorbitant prices for simple database queries is an outdated practice," added Christophe G., Co-Founder and Chief Marketing Officer of Zooom. "With Zooom Car Reports, we are delivering a superior level of value for our customers and an unmatched product for a fraction of the cost. The Summer Launch Offer provides a unique opportunity for car sellers and buyers to engage with our brand and discover the most advanced peer-to-peer car marketplace in America. There has never been a better time to join the Zooom community and benefit from our exclusive ecosystem."

#### About Zooom

Zoom is an innovative automotive technology platform dedicated to bringing transparency, simplicity, and intelligence to the entire car ownership lifecycle. Leveraging proprietary technology, Zoom develops user-centric solutions that break down traditional industry friction, creating a streamlined, cost-effective, and enjoyable experience for car owners, buyers, and sellers.
