#4 EMEA Currency Forecaster in the World Bloomberg FX Rankings for 4 Quarters Through Q2 2026

Bloomberg FX Forecast Accuracy Ranking - EMEA Q2
2026-07-01 13:10:00 GMT

By Bloomberg Automation (Bloomberg) - Q2 FX forecasters are ranked based on three criteria: margin of error, timing (for identical forecasts, earlier ones received more credit), and directional accuracy (movements with the currency's overall direction). The ranking below, which was based on Bloomberg's foreign exchange forecasts (FXFC), was for forecasters who provided forecasts for Q2 in at least three of the four preceding quarters but no later than May 31.

* Scores were calculated each quarter for the three criteria, which were weighted 60%, 30% and 10%, respectively. The final score for each currency pair was the time-weighted average of the four quarterly scores.

* The best overall forecasters were identified by averaging the individual scores for each firm on all 14 currency pairs and all four quarters. Forecasters had to be ranked in at least eight of the 14 pairs to qualify for the overall ranking (16 firms qualified). All ranking tables display the top 20% of the forecasters who were eligible, to a maximum of 10 names.
