

# ClearSK Offers Collagen-Stimulating Injections and Dermal Fillers for Facial Volume and Skin Texture Concerns

---

*Doctor-led aesthetic clinic outlines the difference between collagen-stimulating treatments and dermal fillers for facial rejuvenation options*

SINGAPORE, SINGAPORE, July 20, 2026 /EINPresswire.com/ -- [ClearSK](#), a doctor-led aesthetic clinic established in Singapore in 2008, offers collagen-stimulating injections and dermal fillers as treatment options for patients addressing concerns related to facial volume, contour and skin texture.

What Is a [Collagen-Stimulating Injection](#)?

A collagen-stimulating injection is a treatment designed to encourage the skin's own collagen production. It may support gradual changes in skin texture, firmness and elasticity over time, rather than an immediate change in volume. Results vary from person to person.

What Is a [Dermal Filler](#)?

A dermal filler is designed to restore or add volume to specific facial areas, such as the cheeks or lips, and may produce a more immediate visible change compared to collagen-stimulating injections.

Collagen-stimulating injections and dermal fillers serve different purposes. Collagen-stimulating injections are designed to support the skin's own regenerative processes, with results that build up gradually (results vary from person to person). Dermal fillers are designed to work by adding volume directly, with effects that may be visible soon after treatment and that gradually reduce over time. Which approach, if any, is appropriate depends on an individual's skin concerns, facial structure and treatment goals, and is assessed by a doctor during consultation.

Can These Treatments Be Combined With Other Aesthetic Procedures?

Collagen-stimulating injections work on collagen regeneration rather than adding volume, and target a different layer from energy-based tightening treatments, so a doctor may consider them alongside each other where clinically appropriate.

At ClearSK, treatment recommendations are made following a doctor-led consultation that considers an individual's facial structure, skin condition and aesthetic goals. As with any aesthetic treatment, outcomes and suitability vary from person to person.

## About ClearSK

ClearSK is a doctor-led aesthetic clinic group in Singapore, established in 2008, offering personalised, doctor-designed treatments across multiple clinic locations islandwide. Across its clinic network, more than 200,000 treatments and procedures have been performed, supporting patients with a wide range of skin and aesthetic concerns. Doctors draw from a broad range of treatment options to develop personalised treatment plans based on each individual's clinical presentation. This approach is applied consistently across ClearSK's multiple clinic locations in Singapore.
