

Responding to Global Demand for Non-Laser Tattoo Removal

Demand for tattoo removal services continues to rise worldwide, driven by increasing tattoo prevalence and evolving personal and professional circumstances. The Magnetic Tattoo Removal technique offers practitioners a non-laser, non-invasive approach designed to work across skin tones and pigment types, supported by worldwide patents in more than 12 countries.

To date, Linda Paradis Group has trained and certified more than 2,000 professionals across over 40 countries, including permanent makeup artists, tattoo artists, aesthetic practitioners, and clinics. Through online masterclasses, online certification programs, and a growing international educator network spanning Europe, the Americas, and the Middle East, the company continues to expand access to its patented Magnetic Tattoo Removal® methodology worldwide.

How the Payment Plans Work

The installment options are available directly at checkout on the Linda Paradis Group website for eligible Magnetic Tattoo Removal certification courses. Enrollees select a payment plan at purchase and complete the balance in scheduled monthly installments over a period of up to four months — with no interest and no hidden fees.

Course access begins immediately upon the first payment, allowing students to start their training from day one. Students who pay in full receive immediate shipment of their Premium Starter Kit, containing the professional tools and products used in the Magnetic Tattoo Removal

protocol. Full terms, including scheduled payment requirements, are displayed transparently before purchase.

"Accessibility and professionalism go hand in hand," added Paradis. "By lowering the financial barrier to entry while maintaining rigorous certification standards, we are growing a global community of properly trained practitioners — and that ultimately protects clients and elevates the entire industry."

The payment plan program launches alongside a period of international expansion for the company, which includes its upcoming GCC Masterclass in Dubai in September 2026 and continued growth of its online education catalog.

About Linda Paradis Group

Linda Paradis Group is the global leader in non-invasive tattoo removal science and the inventor of the patented Magnetic Tattoo Removal® technology. The company provides professional certification, patented treatment protocols, proprietary products, and ongoing education to permanent makeup artists, tattoo artists, aesthetic practitioners, clinics, and medical professionals in more than 40 countries worldwide.

Founded by inventor Linda Paradis, the company continues to advance non-invasive tattoo removal through research, patented innovations, professional education, and the development of industry-leading technologies that help practitioners deliver safe and effective cosmetic tattoo removal treatments.
