

FiChecks Launches Cross-Border Payments in 100+ Countries

FiChecks now powers cross-border payments across 100+ countries, delivering faster, secure, and seamless global payment solutions for businesses.

DALLAS, TX, UNITED STATES, July 20, 2026 /EINPresswire.com/ -- [FiChecks](https://FiChecks.com/), a US-based fintech business, is now active in over 100 countries, facilitating all-in-one payment solutions to cater to global commerce needs. The platform can aid businesses in meeting the requirements of international vendors and suppliers who work with local payment rails in their countries.

FiChecks has designed [cross-border payments](#) with fintech businesses, marketplaces, and B2B/B2C operators across these 100+ countries in mind.

“

Our vision is to remove the complexity of cross-border payments. With FiChecks now available in 100+ countries, businesses can move money globally with greater speed, security, and confidence.”

Dr. Saheer Nelli

Understanding the Market Problem of Complex International Payments

While dealing with [global payments](#), organizations and businesses need to follow a well-defined market structure. This is to avoid friction and ensure transparency in the fragmented space. Certain systemic barriers and complexities could exist to drive a wedge between reliable and verified financial transactions.

Some of the issues that businesses could face in this context are volatile FX rates, issues related to compliance

regulations, an incompetent data structure, and processing delays that resonate with legacy settlements. It could cater to issues such as uncertain cash flow, damaged vendor or supplier partnerships, and loss of valuable time and cost.

Bypassing the legacy payments infrastructure is one of the primary factors that can help integrate a smoother transaction flow in the borderless space. Platforms like FiChecks can lead to optimized payment orchestration methods.

Discussing the FiChecks Solution in Place

With FiChecks at the disposal of business units, businesses can engage in streamlined payment routing techniques. The portal pushes for industry standards that can elevate the payments support and fintech requirements, while maintaining essential parameters for success.

FiChecks is a model that enhances the payment context of involved parties with real-time monetary settlements. It could also be a feasible option to enable top-notch compliance programs that adhere to elevate the performance of complex and slow processes.

Navigating cross-border payments is tricky, and the active assistance of a domain like FiChecks is integral in building value toward this goal effectively. This means the provision of infrastructure and structured data models to ensure adequate management of multi-currency accounts.

The Scale & Coverage of New FiChecks Corridors

With 100+ countries spread across different geographical regions like LATAM, MENA, APAC, Europe, and North America, FiChecks can splendidly help SMBs and enterprise models alike. Businesses can rapidly scale in the domain of payment corridors and cross-border transactions.

Real-time treasury updates and liquidity functions can be governed with the platform's built-in solutions. Digital asset management and structured data flow with quality integrations are made possible in this format. New fintech players and partners in this domain can get ideal support with FiChecks' effective and interconnected multi-rail platform modules.

The image contains two promotional graphics for FiChecks. The top graphic, titled 'Cross-Border Payments', features a central globe with icons for a bank, a shield, a dollar sign, a bar chart, and a paper plane, all connected by a circular flow. Below the globe are four icons with labels: '100+ Countries' (globe), 'Secure' (shield), 'Faster Settlements' (lightning bolt), and 'Real-Time Updates' (clock). The bottom graphic, titled 'Create. Print. Mail.', shows a three-step process: 1. CREATE (laptop icon), 2. PRINT (printer icon), and 3. MAIL (envelope icon). Below this is a visual representation of a check being created on a laptop, printed, and then mailed in an envelope. The check itself is for \$2,500.00, dated 05/20/2024, payable to John Smith. At the bottom of the second graphic are four icons with labels: 'Bank-Level Security' (shield), 'Save Time & Effort' (clock), 'Reliable Delivery' (envelope), and 'Cost-Effective Solution' (dollar sign).

How Businesses Can Gain from the Fresh FiChecks Updates

Now that FiChecks is available in more countries, businesses across these remittance corridors can find optimum options to accelerate operational efficiency. Features are available to reduce operational bottlenecks and hassles. The platform integrates with a dynamic system in each country's payment rail network to promote ideal cash flow solutions and mitigate financial fraud.

Some of the ideal advantages that FiChecks can offer to businesses in the new regions of operations are:

Elimination of bulk postage - Higher costs and time incurred from working with traditional methods can be resolved with FiChecks' cross-border platform efforts.

Facilitating higher transactions - The target business models can work with strategic measures to accommodate higher transaction levels and limitless payment support.

Automated payment reconciliation - The new update helps the platform to support businesses with ideal cash flow forecasting and automated payment reconciliation support.

Fraud prevention and detection - Seamless flow of the services under FiChecks related to check writing, printing, and mailing in the new regions will aid in active fraud assessment. Prevention and mitigation of scams and illegal activities can be monitored under this model.

Allocation of secure B2B remittance services - Payment disbursements can be made easier with secure and confidential support driven by B2B remittance models.

Streamlined payments flow - A full-fledged payment flow for various countries can be made feasible with the streamlined activation of the FiChecks online payments portal.

Leadership Quote

Dr. Saheer Nelliparamban, Founder & CEO of FiChecks, remarks, "It has been a great journey with FiChecks so far. We had several plans to expand to different countries from the very beginning. Working with other solutions like Paywint in front of a global audience helped me to aim for the same objectives for FiChecks as well. From this point, we will look forward to integrating more solutions and functions into the platform."

About FiChecks

FiChecks is a secure and efficient platform to write, print, email, and mail checks. ACH payment processing is also attached to the platform to ensure reliable and hassle-free transactions. The

robust product works to promote fast and secure services in precise check management. FiChecks is an intuitive and simple financial tool that caters to the cost-efficient and time-optimized model followed by businesses in their technology application.
