

High Performance Systems Announces Advanced Seamless Flooring Solutions for Tri-State Commercial and Restaurant Kitchens

High Performance Systems Announces Advanced Seamless Flooring Solutions for Tri-State Commercial and Restaurant Kitchens

MIDDLESEX, NJ, UNITED STATES, July 20, 2026 /EINPresswire.com/ -- High Performance Systems, a certified epoxy flooring contractor operating since 1988, has officially announced the expansion of its specialized [commercial and restaurant kitchen flooring services](#). Engineered to meet rigorous safety and hygiene standards, the company's advanced seamless flooring solutions offer an alternative to traditional, high-maintenance kitchen tile for food service and industrial facilities across the region.

Commercial Kitchen Floor System

In high-volume professional kitchens, floors are constantly subjected to extreme conditions. High Performance Systems addresses these challenges by installing high-performance [urethane cement](#) and [anti-slip epoxy systems](#). These non-porous barriers are specifically designed to withstand thermal shock from ovens and walk-in freezers, eliminate bacterial growth, and ensure USDA compliance.

"Our thermal-cured resins create a significantly tighter bond than standard moisture-cure products," said a spokesperson for High Performance Systems. "By eliminating grout lines and focusing on rapid-turnaround installations, we help commercial kitchens maximize operational hygiene while minimizing costly business downtime."

Key benefits of the High Performance Systems commercial kitchen flooring include:

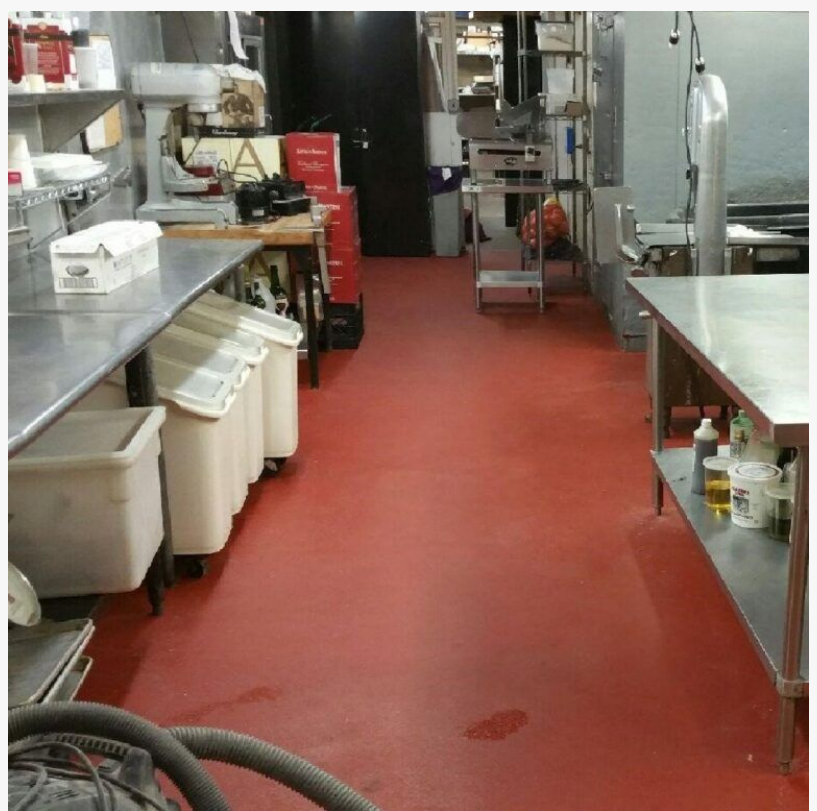

Thermal Shock Resistance: Urethane cement expands and contracts with extreme temperature shifts, preventing cracking.

Antimicrobial & Hygienic: Seamless, non-porous surfaces prevent bacteria and pathogen accumulation.

Slip-Resistant Safety: Customized textures provide peace of mind and protect employees in fast-paced environments.

Rapid Installation: Polyurethane systems cure within hours, allowing facilities to resume operations quickly.

High Performance Systems strictly services commercial, industrial, and food processing facilities, with no residential services offered. For more information or to request a free estimate, visit [High Performance Systems](http://HighPerformanceSystems.com).

Commercial Kitchens

“

By eliminating grout lines and focusing on rapid-turnaround installations, we help commercial kitchens maximize operational hygiene while minimizing costly business downtime.”
