

Breast Center of New England Expands Personalized Breast Imaging Services with CureMetrix's cmAngio®

Boutique breast imaging practice adds AI Breast Arterial Calcification detection to provide additional clinical insight from routine screening mammograms.

SAN DIEGO, CA, UNITED STATES, July 20, 2026 /EINPresswire.com/ --

[CureMetrix](#) today announced that

[Breast Center of New England](#), a women-owned breast imaging practice dedicated to redefining the mammography experience for women across New Hampshire, has added [cmAngio®](#), the first FDA-cleared AI solution for Breast Arterial Calcification (BAC) detection and localization,

CureMetrix Logo

“

From the beginning, our goal has been to create a breast imaging center that feels different, where women receive expert care in a welcoming environment designed around them.”

Eva Lizer, Founder of Breast Center of New England

becoming the first location in New Hampshire to implement the technology. By identifying BAC from the same mammogram used for breast cancer screening, cmAngio provides additional clinical insight with no additional imaging, radiation, appointments, or time required for patients.

Founded on the belief that women deserve a more personal, comfortable, and empowering breast imaging experience, Breast Center of New England pairs an intimate, spa-like environment with advanced breast imaging technology and physician-led care. By adding

cmAngio, the practice is providing a 2-for-1 benefit from routine screening mammograms while staying true to its mission of delivering exceptional care that puts women first.

“From the beginning, our goal has been to create a breast imaging center that feels different, where women receive expert care in a welcoming environment designed around them,” said Dr. Eva Lizer, Founder and Breast Imaging Radiologist at Breast Center of New England. “By incorporating cmAngio into our screening program, we’re able to provide our patients and referring providers with important and impactful information from the mammogram they’re already receiving, while keeping the experience simple, seamless, and patient-centered.”

“Dr. Eva Lizer and her team have built a practice that puts women at the center of every decision, combining personalized care with a commitment to innovation,” said Kevin Harris, President of CureMetrix. “We're proud to partner with Breast Center of New England to bring cmAngio to their patients and provide important clinical insights to their routine screening mammograms. It's a great example of how AI can enhance patient care while preserving the exceptional experience Breast Center of New England is known for.”

As the Breast Center of New England continues to redefine the breast imaging experience, the addition of cmAngio reflects its commitment to combining compassionate, personalized care with innovative technology that helps women get more from every routine mammogram.

About CureMetrix

CureMetrix is advancing women's health through AI-powered imaging solutions designed to help clinicians detect what matters sooner. Founded in 2014 on the belief that artificial intelligence can close the gap between what medicine is capable of and what patients actually receive, CureMetrix develops precision AI that integrates into existing workflows and delivers earlier answers, greater certainty, and additional clinical insight. The company's mission is to help save lives by improving disease detection and extending the value of screening programs worldwide.
