

InventionHome® Product Developer Creates Integrated Disposable Cutlery with Built-In Condiment and Seasoning Dispensers

LITHONIA, GA, UNITED STATES, July 20, 2026 /EINPresswire.com/ -- James D. of Lithonia, GA is the creator of Convenient Condiment Cutlery, a disposable dining utensil designed to combine eating utensils, condiments, and seasonings into a single integrated product. The utensil is available in fork, spoon, and knife configurations and incorporates an internal condiment reservoir and a separate seasoning compartment to reduce the need for multiple disposable accessories during meals. The design is intended to simplify food preparation and eating in environments where access to condiments or seasonings may be limited.

Conventional dining often requires users to gather multiple disposable items, including utensils, condiment packets, seasoning packets, or bottles. Condiment packets can be difficult to open, prone to leaking, and capable of creating unnecessary clutter during meals. Similarly, seasoning containers may not always be available, while carrying separate utensils, condiments, and seasonings can be inconvenient during travel, takeout meals, picnics, or other dining situations.

Convenient Condiment Cutlery integrates multiple food service functions into a single disposable device. Each utensil contains an internal compartment prefilled with a single condiment, such as ketchup, mustard, mayonnaise, or hot sauce. A transparent viewing window positioned along the side of the utensil enables users to quickly identify the condiment contained within the device. When desired, the user presses an integrated actuator button located near the utensil portion, dispensing the condiment through a dedicated outlet positioned near the end of the utensil directly onto the food.

In addition to the condiment reservoir, the opposite end of the device incorporates a separate compartment for seasonings such as salt or pepper. This compartment functions as a miniature shaker that allows users to dispense seasoning without requiring separate packets or containers. The invention streamlines meal preparation while reducing the number of individual accessories required during dining.

Key features and benefits include:

- Combines a disposable eating utensil, condiment dispenser, and seasoning shaker into a single integrated device.
- Incorporates an internal reservoir containing a single condiment, such as ketchup, mustard, mayonnaise, or hot sauce.
- Dispenses condiments directly onto food through an integrated outlet activated by a push-button mechanism.
- Eliminates the need to carry separate utensils, condiment packets, seasoning packets, bottles, or shakers.
- Well suited for takeout meals, travel, outdoor dining, picnics, sporting events, and other situations where conventional dining accessories may be limited.

Convenient Condiment Cutlery provides a practical alternative to conventional food service utensils and condiments. The combination of an eating utensil, condiment dispensing system, and seasoning compartment improves convenience while reducing the number of individual disposable items needed for everyday meals.

James filed his Utility Patent with the United States Patent and Trademark Office (USPTO) and is working closely with [InventionHome](#), a leading invention licensing firm, to sell or license the patent rights to his Convenient Condiment Cutlery product. Ideal licensing candidates would be U.S. based product manufacturers or distributors looking to further develop and distribute this

product innovation.

Companies interested in the Convenient Condiment Cutlery can contact InventionHome at member@inventionhome.com. Inventors currently looking for assistance in patenting, marketing, or licensing their invention can request information from InventionHome at info@inventionhome.com or by calling 1-866-844-6512.

About InventionHome®

InventionHome® is a top-rated invention marketing and product licensing company dedicated to helping inventors successfully patent, prototype, and promote their new product ideas. From securing intellectual property to connecting with potential licensees, InventionHome® offers a streamlined path to commercialization.
