

NYC Plastic Surgeon Honored Among 'Top Aesthetic Gurus in America' by The Hollywood Reporter

Dr. Ira Savetsky, an award-winning aesthetic plastic surgeon, was highlighted among the "49 Best Cosmetic Doctors in America" by The Hollywood Reporter.

NEW YORK CITY, NY, UNITED STATES, July 23, 2026 /EINPresswire.com/ -- Dr. Ira L. Savetsky, a board-certified [aesthetic plastic surgeon in NYC](#), was recently honored among "The 49 Best Cosmetic Doctors and Aesthetic Gurus in America" in the July 2026 issue of The Hollywood Reporter (THR). The article sought to highlight the most prominent plastic surgeons, dermatologists, dentists, and aestheticians trusted by Hollywood to deliver natural-looking, undetectable results. Recently named a 2026 Castle Connolly Top Doctor® and distinguished among New York's Super Doctors®, Dr. Savetsky's feature in THR's "The New Face of Hollywood" issue provides insight into the quality of his natural-looking results in breast, body, and facial plastic surgery.

In the publication, Dr. Savetsky discussed his preference for advanced facial fat transfer techniques over traditional dermal fillers, noting the potential for swelling associated with filler use around the eyes. He detailed his approach of introducing micro fat and nano fat into the treatment site(s) to improve skin quality, explaining that nano fat can be particularly effective for addressing crepiness and dark circles. Dr. Savetsky shed light on the benefits of utilizing nano fat during lower [blepharoplasty](#) procedures and further explains that micro fat can be particularly adept in enhancing facial volume given recent trends in achieving weight loss through GLP-1 medications. "Fat is softer than fillers and can make a [facelift](#) look better for a longer period of time," he comments.

Known for his work in facelift surgery, rhinoplasty, breast surgery, and eyelid surgery, Dr. Savetsky's use of modern and innovative techniques has contributed to his subtle yet powerful outcomes. His inclusion in the article emphasizes Hollywood's broader shift towards refined, "effortless preservation" over more dramatic cosmetic interventions.
