

Implants and Cosmetics Help Improve Patients Smiles and Confidence

Remarkable Implants and Cosmetics To Give You a More Confident Smile

BERGENFIELD, NJ, UNITED STATES, July 27, 2026 /EINPresswire.com/ --

[Bergenfield Dental](#) Showcases Remarkable Dental Implants and Cosmetic Dentistry That Transform Smiles and Lives

Advanced Implant Dentistry, Beautiful Cosmetic Solutions, and Personalized Care Help Patients Regain Confidence, Comfort, and Lasting Oral Health

Bergenfield Dental is redefining what is possible in modern dentistry by combining state-of-the-art dental implant technology with comprehensive cosmetic dentistry to create life-changing smile transformations. Under the leadership of Dr. Ehab Shahid, the practice continues to provide patients throughout Bergen County and Northern New Jersey with advanced treatments that restore oral health, improve appearance, and renew self-confidence using today's most innovative dental techniques. The practice offers comprehensive implant, cosmetic, restorative, family, and IV conscious sedation dentistry under one roof using advanced digital technology and personalized treatment planning.

Every patient who visits Bergenfield Dental receives an individualized treatment plan tailored to their oral health, lifestyle, and aesthetic goals. Whether replacing missing teeth with dental implants, improving smiles with porcelain veneers, whitening discolored teeth, straightening

Smile Confidently

Smile Confidently

teeth with Invisalign®, or completing a full smile makeover, the practice emphasizes results that are both naturally beautiful and highly functional.

"Dentistry has evolved tremendously over the last decade," said Dr. Ehab Shahid, DMD, MAGD, Diplomate, Board Certified by the American Board of Oral Implantology. "Today we can restore smiles more predictably, more comfortably, and more naturally than ever before. Our mission is not simply to replace teeth or improve appearances—it is to help patients enjoy healthier lives with renewed confidence."

Happy Implant Patient

Dental implants have become the gold standard for replacing missing teeth because they closely replicate the strength, appearance, and function of natural teeth. Unlike removable dentures or traditional bridges, implants integrate directly with the jawbone, helping preserve bone structure while providing exceptional stability for eating, speaking, and smiling.

Bergenfield Dental utilizes advanced CBCT 3-D imaging, digital treatment planning, and computer-guided implant placement to maximize precision while minimizing discomfort and recovery time. These technologies allow Dr. Shahid to evaluate bone quality, anatomical structures, and implant positioning with remarkable accuracy before treatment even begins. The result is safer surgery, predictable outcomes, and highly aesthetic restorations that are designed to last for many years with proper care.

For patients missing several teeth—or even an entire arch—the practice offers multiple implant solutions, including implant-supported bridges, overdentures, and full-arch implant restorations. These treatments provide life-changing improvements for patients who have struggled with loose dentures, difficulty chewing, or embarrassment about their smiles.

Cosmetic dentistry is equally important to many patients seeking a more youthful and confident appearance. Bergenfield Dental offers comprehensive cosmetic services including porcelain veneers, professional whitening, cosmetic bonding, Invisalign® clear aligners, porcelain crowns, gum contouring, and complete Smile Makeovers.

Rather than creating smiles that appear overly artificial, Dr. Shahid carefully designs each smile to complement the patient's facial features, personality, and natural appearance. Modern ceramics, digital photography, and smile planning technology enable patients to visualize potential improvements while allowing every detail to be customized before treatment begins.

Patients often seek cosmetic dentistry to correct stained, chipped, worn, uneven, or slightly crooked teeth. Others choose Smile Makeovers before weddings, career changes, graduations, anniversaries, or retirement. Regardless of the reason, Bergenfield Dental believes every patient deserves treatment that improves both aesthetics and long-term oral health.

For patients requiring multiple procedures or those who experience dental anxiety, Bergenfield Dental offers IV Conscious Sedation administered under careful monitoring. Sedation allows patients to relax comfortably while extensive treatment is completed efficiently during fewer appointments. Many patients report remembering very little about their procedures while enjoying a calm, stress-free experience. This approach has helped countless individuals overcome years of dental fear and finally receive the treatment they need.

Technology plays an important role throughout every stage of treatment. Digital impressions eliminate many traditional dental molds while improving accuracy. Digital radiography reduces radiation exposure and provides immediate diagnostic information. Three-dimensional CBCT imaging allows more comprehensive evaluation for implant surgery, complex restorations, and overall treatment planning.

"Our greatest reward is seeing someone smile without hesitation for the first time in years," Dr. Shahid added. "Patients often tell us they feel younger, more confident, and more comfortable socially after completing treatment. Those transformations extend far beyond dentistry."

The practice has earned an outstanding reputation throughout Northern New Jersey by combining clinical excellence with compassionate patient care. Dr. Shahid continues advanced education in implant and cosmetic dentistry while serving as an implant educator and maintaining advanced professional credentials that reflect his commitment to excellence.

Conveniently located at 29 West Church Street in Bergenfield, Bergenfield Dental welcomes new patients seeking advanced implant dentistry, cosmetic dentistry, Smile Makeovers, family dentistry, restorative care, and IV Conscious Sedation. Every treatment plan begins with a comprehensive consultation designed to educate patients about their options while helping them make informed decisions about their oral health.

Patients interested in learning more about dental implants, cosmetic dentistry, or complete Smile Makeovers are encouraged to contact Bergenfield Dental to schedule a personalized consultation at 201-384-0100.
