

India-UK Trade Agreement Opens New Frontiers in Plastic Contract Manufacturing

Under India-UK CETA, zero-duty access on 99% of exports establishes Jyoti World as a strategic plastic contract manufacturing partner for UK OEMs.

MUMBAI, MAHARASHTRA, INDIA, July 23, 2026 /EINPresswire.com/ -- India-UK Trade Pact Drives New Era of Plastic Contract Manufacturing

Landmark India-UK CETA's 99% Duty-Free Market Access Positions India as a Strategic Sourcing Hub for British OEMs; Jyoti World Stands Ready to Accelerate High-Performance Production

KEY ANNOUNCEMENT HIGHLIGHTS:

The India-UK Comprehensive Economic and Trade Agreement (CETA) represents more than a tariff reduction initiative; it signals a deeper manufacturing partnership."

*Mr. Raju Desai, Chairman,
Jyoti World Private Limited*

- **CETA Trade Catalyst:** The newly implemented India-UK Comprehensive Economic and Trade Agreement (CETA) delivers zero-duty market access for nearly 99% of India's exports to the UK, significantly boosting bilateral engineering and manufacturing competitiveness.
- **Precision Contract Manufacturing:** With over six decades of plastics expertise, Jyoti World Private Limited provides UK OEMs a complete, integrated contract manufacturing ecosystem under one roof.
- **Scalable Technical Capabilities:** Jyoti World's end-to-end infrastructure includes product design, in-house tooling, [engineering polymer compounding](#), injection moulding

(60T-1200T), and custom multi-layer profile extrusion.

- **Sustainable Sourcing Alignment:** Advanced material options include post-industrial and post-consumer recycled polymer compounds and the circular INFIN range, supporting global ESG directives.

The recently implemented India-UK Comprehensive Economic and Trade Agreement (CETA) is

set to reshape global manufacturing supply chains by establishing duty-free access for nearly 99% of India's exports to the United Kingdom, including engineering products, chemicals, and industrial goods. This landmark bilateral pact dramatically enhances India's position as a premium, cost-effective manufacturing destination. It presents a highly competitive alternative for British Original Equipment Manufacturers (OEMs) seeking technically advanced and reliable contract manufacturing partners.

As global manufacturers actively diversify their supply lines under 'China Plus One' sourcing strategies, the need for partners who can deliver quality, scalability, and technical engineering support under one roof is critical. The India-UK CETA addresses this need by dismantling trade barriers and allowing Indian contract manufacturers to supply precision components with unprecedented commercial competitiveness.

A Complete Contract Sourcing Partner Beyond Core Plastic Processing:

For companies like Jyoti World Private Limited, which brings over six decades of plastics manufacturing experience, the CETA framework opens up substantial pathways for expansion. Rather than specializing in a single process, the company operates a fully integrated manufacturing ecosystem that covers the entire product lifecycle from its primary facility in Vapi, Gujarat. This integrated model allows UK manufacturers to consolidate multiple suppliers into a single strategic partner, preserving intellectual property, improving consistency, and reducing overall lead times.

Plastic Injection Molding

Jyoti World's end-to-end technical capabilities include:

- Product Design Support & In-house Tool Room: Streamlining design for manufacturability and custom mould fabrication.
- [Precision Injection Moulding](#): Supporting small, intricate precision parts to massive structural components with clamping forces ranging from 60 Ton to 1200 Ton capacity.
- [Custom Profile Extrusion](#): High-performance mono-layer, twin-layer, and tri-layer extruded profiles tailored for complex configurations.
- Engineering Polymer Compounding: In-house compounding and formulation development in Prime, Hybrid and Recycled grades for exact application requirements.
- Post-Processing & Assembly: Plastic machining, multi-component assembly, and comprehensive quality assurance.
- Integrated Logistics: End-to-end export logistics to ensure seamless, hassle-free door-to-door delivery.

In-House Engineering Polymer Compounding Drives Sustainability and Quality:

A major technical advantage for Jyoti World is its in-house compounding division, which handles a broad portfolio of engineering polymers including Nylon 6, Nylon 66, Polycarbonate, PC/ABS Alloys, ABS, and PBT. These formulations are available in Prime, Hybrid, and Recycled grades, and can be customized with reinforcements, flame retardants, UV stabilizers, impact modifiers, and

heat/hydrolysis resistance. By developing custom formulations under one roof, Jyoti World accelerates product development and ensures raw material consistency.

To support global OEMs in meeting stringent environmental and ESG objectives, the company incorporates post-industrial and post-consumer recycled materials. Jyoti World's proprietary INFIN range of recycled plastic products demonstrates how circular materials can be effectively transformed into durable infrastructure solutions, enabling UK OEMs to achieve sustainability goals without sacrificing high-performance engineering specifications.

Forging a Resilient Bilateral Manufacturing Partnership:

The India–UK CETA represents more than a tariff reduction initiative; it marks a deeper, mutually beneficial integration between two leading industrial economies. While the UK contributes world-class innovation and product development demand, India offers advanced engineering talent, extensive manufacturing scale, and cost-efficient production. With the trade agreement now in place, there has never been a more opportune time for UK OEMs to evaluate India as a strategic manufacturing partner for long-term growth and supply chain resilience.

About Jyoti World Private Limited:

Established in 1959, Jyoti World Private Limited is a leading integrated contract manufacturing company specializing in engineering plastics processing. From its state-of-the-art manufacturing facility in Vapi, Gujarat, the company serves domestic and international customers across various sectors, including Electrical & Electronics, Industrial Equipment, Consumer Appliances, Fluid Engineering, Infrastructure, and Packaging. Jyoti World provides end-to-end solutions spanning product design support, in-house tooling, custom-engineered polymer compounds, injection moulding (60T–1200T), profile extrusion, plastic machining, value-added assembly, and recycled infrastructure products.

For more information, please visit www.jyotiworld.com or explore recycled products and custom-engineered polymers at www.jyotiworld.com/products.
