

Notum's Open-Source Strapi Next.js Starter Surpasses 300 GitHub Stars

Notum, a headless CMS agency, announced its open-source Strapi Next.js Starter surpassed 300 GitHub stars, backed by an update adding AI agent support and more.

BRNO, JMK, CZECH REPUBLIC, July 23, 2026 /EINPresswire.com/ -- [Notum](#), a headless CMS development agency and Strapi's Enterprise Partner, announced that its open-source [Strapi Next.js Starter](#) has surpassed 300 stars on GitHub, alongside a significant update to the template that brings native AI agent support, enterprise-grade security guardrails, production-scale performance upgrades, and comprehensive documentation.

“Crossing 300 stars is a good moment to point at, but what we're actually proud of is making the repository genuinely easy to work in, whether that's a new developer or an AI coding agent”

Tomas Jakubek, CTO of Notum

The version 3.4.0 release backports core components of the enterprise architecture Notum uses to build and maintain high-traffic platforms for clients including Konica Minolta, AXA, Meiliseach, Lokalise, Scenic and Strapi itself.

This version adds:

- A comprehensive documentation site for human developers and AI agents alike
- Agent skills for AI-first development
- Hardened security, including runtime security headers and secure preview framing
- Improved performance, including automated CDN cache revalidation

“Crossing 300 stars is a good moment to point at, but what we're actually proud of is making the repository genuinely easy to work in, whether that's a new developer or an AI coding agent,” said Tomas Jakubek, CTO of Notum.

“With version 3.4.0, we backported the parts of our own production architecture that most teams end up rebuilding themselves: cache revalidation, zero-deploy redirects, security headers, and structured logging. Now that operational maturity comes with the starter out of the box,” said Dominik Juriga, Tech Lead at Notum.
