

DTGPRO Expands Award-Winning, Patented MagicSeal Finishing Lineup with Fusion Spray, Pro Sheet, and Pro Fusion System

DTGPRO expands the MagicSeal lineup with Fusion Spray, Pro Sheet and Pro

Fusion System to deliver enhanced durability, softness and finishing performance.

COVINA, CA, UNITED STATES, August 11, 2026 /EINPresswire.com/ -- DTGPRO today announced

“

MagicSeal continues to deliver finishing solutions that help decorators improve print quality, durability and production efficiency.”

Jimmy Cons

the expansion of its MagicSeal transfer finishing lineup with the introduction of [MagicSeal Fusion Spray](#), [MagicSeal Pro Sheet](#), and the complete [MagicSeal Pro Fusion System](#). The new products join the original MagicSeal Spray and MagicSeal Sheet, expanding the award-winning MagicSeal family that has already been recognized with the 2026 Impressions Award for Best New DTF Technology.

The MagicSeal family is built around MagicLine’s patented finishing technology, with MagicSeal Spray already

patented and additional patents pending. Developed to help decorators improve the finished feel, appearance, wash performance, and wearability of transfers after the final press, MagicSeal has quickly become one of DTGPRO’s most important DTF finishing innovations.

With the expanded lineup, DTGPRO now offers multiple finishing choices: proven everyday solutions for soft-feel finishing, upgraded sheet-based finishing for longer production life and workflow flexibility, advanced spray protection for extended wash durability, and a complete Pro Fusion workflow for the best overall MagicSeal performance.

“MagicSeal represents substantial R&Defforts in transfer finishing technology, and we are proud that it has already been recognized with the 2026 Impressions Award for Best New DTF Technology,” said Dr. Dimitris Constantinou, DTGPRO spokesperson. “The original patented MagicSeal Spray remains an important part of the lineup, and with Fusion Spray, Pro Sheet, and the Pro Fusion System, we are giving decorators additional performance levels when they need enhanced wash durability, longer sheet life, or the best overall finishing result.”

The Original MagicSeal Spray remains an excellent choice for decorators who want a fast, easy

spray-applied comfort upgrade for everyday DTF finishing. As MagicLine's original patented spray finishing solution, it is ideal for improving softness and wearability without adding a sheet-based finishing step to every garment. In addition to DTF workflows, it has been adopted and loved by many other technology users, including Vinyl / DTV, White Toner Transfers, DTG and Plastisol Transfers.

The Original MagicSeal Sheet remains a proven reusable finishing sheet for decorators who prefer a sheet-based finishing workflow. Rated for up to 500 presses, it provides a premium soft-touch finish and continues to be a strong option for shops looking for a reliable finishing sheet at an accessible level.

MagicSeal Fusion Spray

The All New MagicSeal Fusion Spray(released July 2026) introduces a new durability-focused spray option for DTF transfers. The MagicSealFusion Spray is engineered to significantly expand washability and is designed to support 100+ wash performance when properly applied and used under appropriate garment production and washing conditions. It helps significantly protect DTF transfers against repeated washing, friction, abrasion, moisture, UV exposure, and everyday wear while maintaining a soft, flexible finished feel.

The All New MagicSeal Pro Sheet is a new professional-grade reusable finishing sheet. Compared with the original MagicSeal Sheet's rating of up to 500 presses, the MagicSeal Pro Sheet is designed for up to 1,000 presses. It also eliminates the need to lower normal DTF press temperature, making it easier to integrate into existing production workflows. The sheet uses fiberglass stabilization technology and a proprietary silicone finishing interface to help deliver consistent, professional finishing results over repeated use.

For decorators who want the highest overall finishing performance, DTGPRO has also introduced the MagicSeal Pro Fusion System, which combines the MagicSeal Fusion Spray with the MagicSeal Pro Sheet. This system is designed to deliver the best overall MagicSeal result by pairing Fusion Spray's advanced durability layer with the Pro Sheet's premium finishing surface.

The expanded MagicSeal lineup gives decorators a clear way to choose the best finishing

method for each job:

MagicSeal Product Main Strength Best For

Original MagicSeal Spray Patented, award-winning spray finishing technology for fast comfort and softness upgrades Everyday DTF finishing, quick workflow improvement, soft-feel enhancement, also for Vinyl and more.

MagicSeal Sheet Proven reusable soft-touch finishing sheet Premium sheet finishing, soft surface feel, up to 500 presses

MagicSeal Fusion Spray Advanced durability and 100+ wash performance High-wash DTF garments, workwear, uniforms, outdoor apparel, heavy-use applications

MagicSeal Pro Sheet Professional finishing sheet with up to 1,000 presses Production shops, normal DTF press temps, consistent premium finishing

MagicSeal Pro Fusion System Best overall MagicSeal performance Maximum softness, durability, comfort, breathability, consistency, and wash-and-wear protection

The product ladder is designed to help shops choose the right solution without replacing the value of the original MagicSeal products. A decorator focused on speed and comfort may choose the Original MagicSeal Spray. A shop that prefers a reusable finishing sheet may choose the Original MagicSeal Sheet. A decorator producing high-wash garments may choose the MagicSeal Fusion Spray. A production shop seeking a longer-life finishing sheet may choose the MagicSeal Pro Sheet. For the most complete result, the Pro Fusion System combines the strengths of Fusion Spray and Pro Sheet into one premium finishing workflow.

The expansion reinforces DTGPRO's commitment to advancing DTF and garment production beyond print quality alone. As decorators compete for higher-value apparel jobs, MagicSeal gives shops a way to improve not only how transfers look, but how they feel, wash, wear, and perform over time.

MagicSeal Fusion Spray, MagicSeal Pro Sheet, and MagicSeal Pro Fusion System are now available through DTGPRO.com, alongside the original MagicSeal Spray and MagicSeal Sheet.

About DTGPRO

DTGPRO is a digital printing equipment and supplies provider specializing in DTG, DTF, UV, UV-DTF, edible printing, and specialty customization solutions. DTGPRO provides equipment, consumables, training, technical support, and business-ready print solutions for apparel decorators, print shops, custom product businesses, and entrepreneurs.
